

Membrane Structure and Function POGIL Answer key

Exam 2023

How many different types of molecules are shown in Model 1? - ANSWER two: circle and triangle

Number of triangles and circles on each side of membrane? - ANSWER 14 triangles on left: 0 triangles on right

12 circles on left: 13 circles on right

Which shape is larger? - ANSWER triangle

Describe direction of movement of molecules in Model 1. - ANSWER Random-all directions

Which molecules are able to pass through the semi-permeable membrane? - ANSWER Circles can fit through the gaps due to small size and are nearly equally distributed on both sides of the membrane.

Would you expect the Model 1 system to change over time? - ANSWER No. The triangles will remain on the left side because they are too big to pass through membrane. Circles will remain evenly distributed on both sides due to size and random movement.

What two major types of biological molecules compose the majority of the cell membrane in Model 2? - ANSWER Phospholipids and membrane spanning proteins.

How many different protein molecules are found in Model 2? - ANSWER Four. Two small surface proteins and 2 membrane spanning proteins.

What is the difference between the position of the surface proteins and the membrane-spanning proteins? - ANSWER Surface proteins do not span the cell membrane.

When a carbohydrate chain is attached to a protein, what is the structure called? - ANSWER Glycoprotein; glyco = carbohydrate

When a carbohydrate is attached to a phospholipid, what is the structure called? - ANSWER Glycolipid

Control of Membrane Function: short-term and long-term J.M. Ritchie, P. Magistretti, L. Bolis, 2012-12-02 A critical factor in cell to cell interactions is the presence in the cell membrane of highly specific ion channels controlled by specific receptors that are bound to and activated by a gamut of external hormones and neurotransmitters Through both this action on ion channels and action on other membrane components such as G proteins extracellular signals alter intracellular events usually through the mediation of second messengers and so provide the basis for the transduction mechanism connecting extracellular signals with intracellular effectors This volume deals with the various ways that such membrane function is controlled

The Structural Basis of Membrane Function Youssef Hatafi, 2012-12-02 The Structural Basis of Membrane Function is a documentation of an international symposium of the same title This book serves as a collection of the significant articles pertaining to the field of membrane research It is composed of seven parts where the first and last parts are articles contributed by scientific authorities The book generally discusses the membrane research and this study's relevance to the society Then the book specifically looks into membrane features including its structure processes in its functions and types Some of the specific topics included in the discussion of each part are phospholipases and monolayers used in studies of membrane structure molecular aspects of active transport and electron transfer in energy transducing membranes The book also explains the two functions in common of biological membranes synaptic receptor proteins and liver microsomal membranes The scope of this book is broad and helpful to many fields of science It will be of great benefit to students teachers scientists and researchers in the field of biochemistry biology molecular biology chemistry pharmacology and cellular biology among others

Biological Membranes Roger Harrison, 2013-11-22 to the Second Edition RESEARCH INTO MEMBRANE ASSOCIATED PHENOMENA HAS EXPANDED VERY greatly in the five years that have elapsed since the first edition of Biological Membranes was published It is to take account of rapid advances in the field that we have written the present edition There is now general acceptance of the fluid mosaic model of membrane structure and of the chemiosmotic interpretation of energetic processes and our attention has shifted from justifying these ideas to explaining membrane functions in their terms Much more information has become available concerning the role of the plasma membrane in the cell's recognition of and response to external signals and this is

reflected in the increased coverage of these topics in the book The general form of the book remains the same As before a list of suggested reading sub divided by chapter is provided and this has been expanded to include a greater proportion of original papers The book is still primarily designed as an advanced undergraduate text and also to serve as an introduction for post graduate workers entering the field of membrane research We have taken cognizance of the comments of many reviewers colleagues and students on the first edition and thank them for their contributions In particular we wish to acknowledge our colleagues R Eisinger, G D Holman, D W Hough and A H Rose Dr C R *The Molecular Basis of Membrane Function* a Symposium (1968: North Carolina) Society of General Physiologists, 1969 Biophysical Chemistry of Membrane Functions Arnošt Kotyk, Dr. Karel Janáček, Jiří Koryta, 1988 The book provides balanced information on the biology chemistry and physics of membrane properties and their specific functions in the flow of material transduction of energy and transformation of signals Up to date specific data on these various properties and functions are contained in the book thus making it a reference text on such subjects as membrane composition membrane structure all known systems of transport all different mechanisms of energy transduction and on selected types of signal transformation **Membrane Structure and Function** Evelyn Edward Bittar, 1980 *PreTest Key Concepts: Membrane function* John R.
