Library,1971 **Dynamic Industrial Policy in Africa** United Nations. Economic Commission for Africa,2014 For millions of Africans growth is yet to translate into jobs and better living conditions Africa s largely commodity driven growth has not been matched by the much needed structural change that can lead to economic transformation employment and reduced poverty Market failures necessitate industrial policy interventions Yet in the absence of the right processes and institutions good industrial policies will fail Indeed weak institutions and poor policy design have hindered industrial policy

This report gives a framework for getting the policy process right to foster industrialization. It uses 11 country case studies to assess the critical ingredients for spurring industrialization: innovative institutions, effective processes, and flexible mechanisms and structural transformation. Asian Development Outlook 2015, 2015     Transportation and Public Policy 2002 National Research Council (U.S.). Transportation Research Board, 2001     **Arab Middle Class**, 2014

The present report studies the Arab middle class, an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic and social development outcomes in the Arab region. This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long-standing dictators by marking elements influencing middle class allegiances, specifically those that weakened their well-established alliances with ruling regimes. The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition. Studying the middle class is therefore crucial to interpreting the past, understanding the present, and reading the potential future development prospects of the Arab region. This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class. The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure. The second relates to the profiling of the Arab middle class using variables such as education, employment, and mobility in addition to multidimensional poverty. The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective. The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State. Publisher's description
