examines this treatment in light of the rationale underlying anti dumping reflecting its alleged significance of ensuring fair trade It in particular investigates the varied non market economy treatment practices responding concerns of China s rising as a large state led economy analyzing the deviation of NME treatment into an all in trade tool The book argues against preconceived bias and unilateral protectionism It highlights the universal existence of government involvement in the market and proposes objective assessment of its impact on fair trade Final proposition of the book is depoliticizing trade reforming comprehensively international trade rules to carefully calibrate different values including promoting fairness and enhancing global social welfare It envisages a multi dimension overhaul of international trade rules to rebalance trade interests rather than roughly labeling an economy to confer different treatment the practices of which lead to separation and chaos The book is of particular relevance and interest to economies in transition and among policy makers academicians and legal practitioners engaged in trade remedies and trade rules reconstruction **"Code of Massachusetts regulations, 2014"**
