In England, entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools. A striking theme of the book. This important book first investigates the university as an institution and then tracks the individual on their journey to and through university. In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual. The book also makes illuminating comparisons with higher education in other countries especially the US and Germany. Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014, the author offers a powerful account of the value of higher education and the case for more expansion. He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees. The final section addresses some of the big questions for the future such as the relationship between universities and business especially in promoting innovation. He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly. This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework. Learner Corpora in Language Testing and Assessment Marcus Callies, Sandra Götz, 2015-04-15 The aim of this volume is to highlight the benefits and potential of using learner corpora for the testing and assessment of L2 proficiency in both speaking and writing.

reflecting the growing importance of learner corpora in applied linguistics and second language acquisition research Identifying several desiderata for future research and practice the volume presents a selection of original studies covering a variety of different languages It features studies that present very thoroughly compiled new corpus resources which are tailor made and ready for analysis in LTA new tools for the automatic assessment of proficiency levels and new methods of self assessment with the help of learner corpora Other studies suggest innovative research methodologies of how proficiency can be operationalized through learner corpus data The volume is of particular interest to researchers in applied corpus linguistics learner corpus research language testing and assessment as well as for materials developers and language teachers
