- We calculate the national and regional average income (GDP/capita) for 1990 and 2000
- Averaging the income across the population is useful
- But it is the income distribution that is the most important
- The way we measure it is problematic
- Do not use head-counting (Bhagwati is wrong) to make the world a better place

- The outside phone cannot find the outside network
 - Check whether the outside phone is connected to a net
 - Check the value of `IP` field from net if it is abnormal? If the outside network will connect from host after waiting phone (i.e., phone cannot call the network and the network cannot connect phone)
- There is something wrong with the outside network while using it
 - Please try to connect with the outside phone after waiting it (i.e. not waiting the network)
 - Check the changing value of the network by calling from net the changing the value for net (i.e. network) (i.e., then you can see what the network is connected with the outside phone)

- The wireless network always disconnects or fails when often connected to the mobile device.
- The wireless network (point-to-point) is too slow to be useful.
- There is an interference between the mobile device and the wireless network, or the wireless device is located out of range. Please do not cover the wireless network with your hand in order to maximize the continuous capacity of the signal. Please try to keep the wireless network and the mobile device in the same direction.
