Development and the Sustainable City Nadège Gunia, Jean-Pierre Mignot, Marc-André Mequignon, Isabelle Bouchardy, Yann Ferguson, 2025-02-26 This book examines the city and its rapid growth as well as the sustainability issues it poses in several ways First there is a critical approach to development as expressed by the concept of sustainable development The city as a complex system primarily refers to questions of sustainability performance which we believe to be capable of resolving problems and difficulties even when viewed from a local perspective and therefore from the point of view of the areas in which it must act Lastly the issue of sustainability cannot be addressed without contemplating and concluding how acceptable it is to the populations concerned All challenges raised by the urban character of the city are therefore linked to the more general question of how to define the concept of sustainable development and the sustainable city as a key area of concern
