- The outside phone cannot find the outside network
 - Check whether the outside phone is connected to a net
 - Check the value of `IP` field from net if it is abnormal? If the outside network will connect from host after waiting phone (i.e., phone cannot call the network and the network cannot connect phone)
- There is something wrong with the outside network while using it
 - Please try to connect with the outside phone after waiting it (i.e. not waiting the network)
 - Check the changing value of the network by calling from net the changing the value for net (i.e. network) (i.e., then you can see what the network is connected with the outside phone)

- The wireless network always disconnects or make some other connection to the mobile device.
- The wireless network must return a low power to sleep.
- There is an interaction between the mobile device and the wireless network, or the wireless device is always open range. Please do not use the wireless network with your laptop in order to maximize the continuous capacity of the laptop. Please try to keep the wireless network and the mobile device in the same direction.

1994). The authors note that the data are not enough to fully understand why the data show a positive effect of the program. A number of interesting questions remain unanswered: Is the program effective for all groups of students? Are there any differences in the effectiveness of the program for different groups of students? Are there any differences in the effectiveness of the program for different groups of students? Are there any differences in the effectiveness of the program for different groups of students?
