Chapter 01: Maternity and Women's Health Care Today

Foundations of Maternal-Newborn & Women's Health Nursing, 8th Edition

MULTIPLE CHOICE

1. A nurse educator is teaching a group of nursing students about the history of family-centered maternity care. Which statement should the nurse include in the teaching session?
 - a. The Sheppard-Towner Act of 1921 promoted family-centered care.
 - b. Changes in pharmacologic management of labor prompted family-centered care.
 - c. Demands by physicians for family involvement in childbirth increased the practice of family-centered care.
 - d. Parental requests that infants be allowed to remain with them rather than in a nursery initiated the practice of family-centered care.

ANS: D

As research began to identify the benefits of early, extended parent–infant contact, parents began to insist that the infant remain with them. This gradually developed into the practice of rooming-in and finally to family-centered maternity care. The Sheppard-Towner Act provided funds for state-managed programs for mothers and children but did not promote family-centered care. The changes in pharmacologic management of labor were not a factor in family-centered maternity care. Family-centered care was a request by parents, not physicians.

DIF: Cognitive Level: Application OBJ: Nursing Process Step: Planning
MSC: Patient Needs: Health Promotion and Maintenance

2. Expectant parents ask a prenatal nurse educator, "Which setting for childbirth limits the amount of parent–infant interaction?" Which answer should the nurse provide for these parents in order to assist them in choosing an appropriate birth setting?
 - a. Birth center
 - b. Home birth
