Part I introduces petroleum technology, refining, and products and reviews the nomenclature used by refiners, environmental scientists, and engineers. Part II discusses environmental technology and analysis and provides information on environmental regulation and the impact of refining. Coverage includes in-depth descriptions of analyses related to gaseous emissions, liquid effluents, and solid waste. A checklist of relevant environmental regulations. Numerous real world examples of the application of environmental regulations to petroleum refining and petroleum products. An analysis of current and proposed methods of environmental protection and waste management.
