Modern Cantonese Phonology Trends In Linguistics Studies And Monographs:

Modern Cantonese Phonology Robert S. Bauer, Paul K. Benedict, 2011-07-20 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing. To discuss your book idea or submit a proposal, please contact Birgit Sievert. [Advances in Chinese Spoken Language Processing](#) Chin-Hui Lee, 2007 After decades of research activity, Chinese spoken language processing (CSLP) has advanced considerably both in practical technology and theoretical discovery. In this book, the editors provide both an introduction to the field as well as unique research problems with their solutions in various areas of CSLP. The contributions represent pioneering efforts ranging from CSLP principles to technologies and applications, with each chapter encapsulating a single problem and its solutions. A commemorative volume for the 10th anniversary of the international symposium on CSLP in Singapore, this is a valuable reference for established researchers and an excellent introduction for those interested in the area of CSLP. *The Handbook of Historical Linguistics, Volume II* Richard D. Janda, Brian D. Joseph, Barbara S. Vance, 2020-09-15 An entirely new follow-up volume providing a detailed account of numerous additional issues, methods, and results that characterize current work in historical linguistics. This brand new second volume of *The Handbook of Historical Linguistics* is a complement to the well-established first volume first published in 2003. It includes extended content allowing uniquely comprehensive coverage of the study of languages over time. Though it adds fresh perspectives on several topics previously treated in the first volume, this Handbook focuses on extensions of diachronic linguistics beyond those key issues. This Handbook provides readers with studies of language change whose perspectives range from comparisons of large open vs. small closed corpora via creolistics and linguistic contact in general to obsolescence and endangerment of languages. Written by leading scholars in their respective fields, new chapters are offered on matters such as the origin of language, evidence from language for reconstructing human prehistory, invocations of language present in studies of language past, benefits of linguistic fieldwork for historical investigation, ways in which not only biological evolution but also field biology can serve as heuristics for research into the rise and spread of linguistic innovations, and more. Moreover, it offers novel and broadened content complementing the earlier volume so as to provide the fullest available

overview of a wholly engrossing field includes 23 all new contributed chapters treating some familiar themes from fresh perspectives but mostly covering entirely new topics features expanded discussion of material from language families other than Indo European provides a multiplicity of views from numerous specialists in linguistic diachrony The Handbook of Historical Linguistics Volume II is an ideal book for undergraduate and graduate students in linguistics researchers and professional linguists as well as all those interested in the history of particular languages and the history of language more generally
