

My Choice for My Future Career

Name: My NGUYEN Instructor: Mr. Voeller Class: ESOL 0051 Date: April 3rd, 2012. Final draft My choice for my future career Today the economic crisis continuously affects the life of everyone in the United States, especially young adults who have just graduated from high school and prepared for independent life. So the most important question for every youngster is which career he or she wants to do with his or her life. It is important because if our choices are wrong, we will waste our money, our time, and maybe our mental and physical health.

However, we might not know if the path we chose will be the correct one until later in life. Right now I am confident in my decision of becoming a pharmacist for the three reasons below. First and foremost, we must have a passion for and an interest in our career because we will work in our field every day. In this case, as a pharmacist, we must have a strong interest in health care, science and especially chemistry (Bolster, Brynildssen, Cohen, and co-writers 676). My interest in chemistry began when I was in tenth grade, the Royal Australian Chemical Institute and my school held a Chemistry Exam for all of students in my grade.

My classmates and I studied and prepared a lot for this exam because we heard that the awards would be a scholarship to study abroad in Australia. However, when studying for the exam, I was actually interested in chemistry myself. So, although for this exam I only got the bronze medal but the knowledge that I gained from this experience was priceless. When I did the research for this exam, I realized that many discoveries in chemistry would be used in medicine to prevent or to cure human diseases. For example, I respected Marie Curie, the female scientist who discovered the element radium.

That element is used in X-Ray to diagnose diseases; in Radiotherapy, a treatment method using in Oncology; and in Radiopharmacy, "the use of radioactive drugs for diagnostic or therapeutic purpose" (Bolster, Brynildssen, Cohen, and co-writers 674). At that time I hoped that I would have many chances in the future to study more about chemistry and how it is applied in health care. In this Chemistry exam, I had a lab session so my friends and I had some hours to practice in lab with our instructor. I was excited with every lecture and lab session. I liked to practice in lab, and see the chemical reactions.

I had some memorable experience in chemistry lab, such as creating a small explosion when combining some chemicals together; and burning my hand when pouring a liquid too fast. My chemistry teacher said that if I liked to study chemistry and find information about this field then I would become a chemist or a pharmacist. "Occupational Outlook Handbook, 2010-2011 Edition, Pharmacist" indicated that compounding or mixing of chemical ingredients to form medications is a part of a pharmacist's practice. This is another reason
