Combinatorial Floer Homology Vin de Silva, Joel W. Robbin, Dietmar A. Salamon, 2014-06-05 The authors define combinatorial Floer homology of a transverse pair of noncontractible nonisotopic embedded loops in an oriented manifold without boundary prove that it is invariant under isotopy and prove that it is isomorphic to the original Lagrangian Floer homology Their proof uses a formula for the Viterbo Maslov index for a smooth lune in a manifold [Show Me the Evidence](#)

Ron Haskins, Greg Margolis, 2014-12-01 The first comprehensive history of the Obama administration's evidence based initiatives From its earliest days the Obama administration planned and enacted several initiatives to fund social programs based on rigorous evidence of success Ron Haskins and Greg Margolis tell the story of six spanning preschool and K 12 education teen pregnancy employment and training health and community based programs Readers will appreciate the fast moving descriptions of the politics and policy debates that shaped these federal programs and the analysis of whether they will truly reshape federal social policy and greatly improve its impacts on the nation's social problems Based on interviews with 134 individuals including advocates officials at the Office of Management and Budget and the Domestic Policy Council Congressional staff and officials in the federal agencies administering the initiatives as well as Congressional and administration documents and news accounts the authors examine each of the six initiatives in separate chapters The story of each initiative includes a review of the social problem the initiative addresses the genesis and enactment of the legislation that authorized the initiative and the development of the procedures used by the administration to set the evidence standard and evaluation requirements including the requirements for grant applications and awarding of grants [Studies in Intelligence](#), 2016

Environmental Politics for a Changing World Ronnie D. Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoengineering

Hitting Probabilities for Nonlinear Systems of Stochastic Waves Robert C. Dalang, Marta Sanz-Solé, 2015-08-21 The authors consider a d dimensional random field $u(x)$ that solves a nonlinear system of stochastic wave equations in spatial dimensions $k = 1, 2, 3$ driven by a spatially homogeneous Gaussian noise that is white in time They mainly consider the case where the spatial covariance is given by a Riesz kernel with exponent Using Malliavin calculus they establish upper and lower bounds on the probabilities that the random field visits a deterministic subset of \mathbb{R}^d in terms respectively of Hausdorff measure and Newtonian capacity of this set The dimension that

appears in the Hausdorff measure is close to optimal and shows that when $d \geq 2k+1$ points are polar for u . Conversely in low dimensions d points are not polar. There is however an interval in which the question of polarity of points remains open.

What's Our Problem? Tim Urban, 2023-02-21 From the creator of the wildly popular blog Wait But Why a fun and fascinating deep dive into what the hell is going on in our strange unprecedented modern times. Between 2013 and 2016 Tim Urban became one of the world's most popular bloggers writing dozens of viral long form articles about everything from AI to colonizing Mars to procrastination. Then he turned his attention to a new topic: the society around him. Why was everything such a mess? Why was everyone acting like such a baby? When did things get so tribal? Why do humans do this stuff? This massive topic sent Tim tumbling down his deepest rabbit hole yet through mountains of history, evolutionary psychology, political theory, neuroscience, and modern day political movements as he tried to figure out the answer to a simple question: What's our problem? Six years later he emerged from the hole holding this book. What's Our Problem is a deep and expansive analysis of our modern times in the classic style of Wait But Why, packed with original concepts, sticky metaphors, and 300 drawings. The book provides an entirely new framework and language for thinking and talking about today's complex world. Instead of focusing on the usual left-center-right horizontal political axis which is all about what we think, the book introduces a vertical axis that explores how we think as individuals and as groups. Readers will find themselves on a delightful and fascinating journey that will ultimately change the way they see the world around them. Anyway, he wanted to say a lot more about all of this but there was a word limit on this book description so just go read the book.
