

- 1 A car of mass 600 kg travels along a straight horizontal road. The resistance to the car's motion is constant and equal to $R \text{ N}$.
- (i) Find the value of R , given that the car's acceleration is 1.4 m s^{-2} at an instant when the car's speed is 18 m s^{-1} and its engine is working at a rate of 22.5 kW . [4]
- (ii) Find the rate of working of the car's engine when the car is moving with a constant speed of 15 m s^{-1} . [1]
- 2 A and B are two points which are 10 m apart on the same horizontal plane. A particle P starts to move from rest at A, directly towards B, with constant acceleration 0.5 m s^{-2} . Another particle Q is moving directly towards A with constant speed 0.75 m s^{-1} , and passes through B at the instant that P starts to move. At time $T \text{ s}$ after this instant, particles P and Q collide. Find
- (i) the value of T , [4]
- (ii) the speed of P immediately before the collision. [1]

3

A and B are fixed points of a vertical wall with A vertically above B. A particle P of mass 0.7 kg is attached to A by a light inextensible string of length 3 m . P is also attached to B by a light inextensible string of length 2.5 m . P is maintained in equilibrium at a distance of 2.4 m from the wall by a horizontal force of magnitude 10 N acting on P (see diagram). Both strings are taut, and the 10 N force acts in the plane APB which is perpendicular to the wall. Find the tensions in the strings. [6]

- 4 A particle P moves on a straight line, starting from rest at a point O of the line. The time after P starts to move is $t \text{ s}$, and the particle moves along the line with constant acceleration $\frac{1}{12} \text{ m s}^{-2}$ until it passes through a point A at time $t = 8$. After passing through A the velocity of P is $\frac{1}{2} t^{\frac{1}{2}} \text{ m s}^{-1}$.
- (i) Find the acceleration of P immediately after it passes through A . Hence show that the acceleration of P decreases by $\frac{1}{12} \text{ m s}^{-2}$ as it passes through A . [4]
- (ii) Find the distance moved by P from $t = 0$ to $t = 27$. [3]

Maths 2014 Cie June Papers 9709:

Handbook of Computability and Complexity in Analysis Vasco Brattka, Peter Hertling, 2021-06-04 Computable analysis is the modern theory of computability and complexity in analysis that arose out of Turing's seminal work in the 1930s. This was motivated by questions such as which real numbers and real number functions are computable and which mathematical tasks in analysis can be solved by algorithmic means. Nowadays this theory has many different facets that embrace topics from computability theory, algorithmic randomness, computational complexity, dynamical systems, fractals, and analog computers up to logic, descriptive set theory, constructivism, and reverse mathematics. In recent decades, computable analysis has invaded many branches of analysis, and researchers have studied computability and complexity questions arising from real and complex analysis, functional analysis, and the theory of differential equations up to geometric measure theory and topology. This handbook represents the first coherent cross-section through most active research topics on the more theoretical side of the field. It contains 11 chapters grouped into parts on computability in analysis, complexity, dynamics, and randomness, and constructivity, logic, and descriptive complexity. All chapters are written by leading experts working at the cutting edge of the respective topic. Researchers and graduate students in the areas of theoretical computer science and mathematical logic will find systematic introductions into many branches of computable analysis and a wealth of information and references that will help them to navigate the modern research literature in this field. *Cambridge International AS & A Level Further Mathematics Further Mechanics* Jean-Paul Muscat, Sophie Goldie, 2018-05-14 Exam board Cambridge Assessment International Education Level A level Subject Mathematics First teaching September 2018 First exams Summer 2020 Endorsed by Cambridge Assessment International Education to provide full support for Paper 3 of the syllabus for examination from 2020.
