Educational Reconstruction Gary McCulloch, 2013-09-05 This book presents a clear overview of the debates that surrounded the making of the 1944 Act which affected every aspect of education in this country It gives a detailed account of the tripartite divisions into three types of child that were sanctioned in the reforms of the 1940s At the same time it also emphasises the idea of education as a civic project which underlay the reforms and which was such an important part of their lasting authority The education policies of the past decade and the current attempts to shape a new education settlement need to be interpreted in a long term historical framework and in particular in relation to the aims and problems of the last great cycle of reform in the 1940s This book makes an important contribution to the development of such a framework and the social history of education policy in this country

Antarctica David Day, 2013-05-03 Since the first sailing ships spied the Antarctic coastline in 1820 the frozen continent has captured the world's imagination David Day's brilliant biography of Antarctica describes in fascinating detail every aspect of this vast land's history two centuries of exploration scientific investigation and contentious geopolitics Drawing from archives from around the world Day provides a sweeping large scale history of Antarctica Focusing on the dynamic personalities drawn to this unconquered land the book offers an engaging collective biography of explorers and scientists battling the elements in the most hostile place on earth We see intrepid sea captains picking their way past icebergs and pushing to the edge of the shifting pack ice sanguinary sealers and whalers drawn south to exploit the Penguin El Dorado famed nineteenth century explorers like Scott and Amundson in their highly publicized race to the South Pole and aviators like Clarence Ellsworth and Richard Byrd flying over great stretches of undiscovered land Yet Antarctica is also the story of nations seeking to incorporate the Antarctic into their national narratives and to claim its frozen wastes as their own As Day shows in a place as remote as Antarctica claiming land was not just about seeing a place for the first time or raising a flag over it it was about mapping and naming and more generally knowing its geographic and natural features And ultimately after a little known decision by FDR to colonize Antarctica claiming territory meant establishing full time bases on the White Continent The end of the Second World War would see one last scramble for polar territory but the onset of the International Geophysical Year in 1957 would launch a cooperative effort to establish scientific bases across the continent And with the Antarctic Treaty science was in the ascendant and cooperation rather than competition was the new watchword on the ice Tracing history from the first sighting of land up to the present day Antarctica is a fascinating exploration of this deeply alluring land and man's struggle to claim it

Placing the Border in Everyday Life Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations

within and beyond the state's territory. Nevertheless, it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done. Similarly, border work is more likely to be done by particular people than others. This book investigates the diffusion of bordering narratives and practices by asking who borders and how. *Placing the Border in Everyday Life* complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places. This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done. By combining a new theorization of border work beyond the state with rich empirical case studies, this book makes a ground-breaking contribution to the study of borders and the state in the era of globalization.

The Papers of George Catlett Marshall George Catlett Marshall, 1981 The two years covered in the fifth volume of *The Papers of George Catlett Marshall* were among the most momentous in the life of Army Chief of Staff George C. Marshall and in the course of the twentieth century. A year of transitions for Marshall, 1945 witnessed the final assault on Nazi Germany and the use of atomic weapons against Japan. Allied forces under the command of Marshall's protégé Dwight D. Eisenhower had contained Hitler's Ardennes offensive at the beginning of the year and launched the final drive to smash the German regime. The war against Japan seemed far from over, however, and Marshall was deeply involved in planning for the massive and difficult redeployment of troops and materials from Europe to the Pacific. The debate with the U.S. Navy over supreme command of the invasion of Japan continued through the first six months of the year until Marshall secured Douglas A. MacArthur's appointment. In May and June, the chief of staff was involved in the decision to use the new atom bomb. Military-related political problems continued to consume much of Marshall's time as the Second World War drew to a close, although he was only peripherally involved in the Big Three conferences at Yalta and Potsdam. Instead, demobilization and readying U.S. Army ground and air forces for the postwar era were Marshall's chief concerns. He pressed for a unified military department against navy opposition and also lobbied incessantly for universal military training for all physically fit eighteen-year-old males as the key element in the nation's military readiness and deterrent value. After the fighting ceased, Marshall expected to retire, having served on active duty since 1902, but President Truman kept him in office until late November 1945. The day after his retirement, the president asked him to go to China to mediate in that country's increasingly violent civil war. Despite his initial success in negotiating a cease-fire between the Nationalists and Communists, irreconcilable differences soon led to renewed fighting. Marshall's continued hopes for achieving a political compromise, along with knowledge that his mission was the only hope for avoiding a disaster in China, kept him in the country until early 1947. He returned to the United States only when the president announced that General Marshall would join his

cabinet as secretary of state From The Papers of George Catlett Marshall The one great element in continuing the success of an offensive is maintaining the momentum This was lost last fall when shortages caused by the limitation of port facilities made it impossible for us to get sufficient supplies to the armies to continue their sweep into Germany when they approached the German border Once additional ports had been captured and reopened there was a shortage of rail and transportation facilities with which to get supplies forward Now the port facilities and the interior supply lines are adequate Subject to the worldwide shortage of both cargo and personnel shipping there is no foreseeable shortage which will be imposed by physical events in the field Speech to the Overseas Press Club March 1 1945 Today we celebrate a great victory a day of solemn thanksgiving My admiration and gratitude go first to those who have fallen and to the men of the American armies of the air and ground whose complete devotion to duty and indomitable courage have overcome the enemy and every conceivable obstacle in achieving this historic victory Marshall V E Day Radio Address May 8 1945 **New York Court of Appeals.**
