Memorandum For Paper September 2012:

Non-Legality in International Law Fleur Johns,2013-01-03 Shows how international lawyers make non law extra legal illegal and other non legal phenomena and why this matters in global politics today The US and Latin America Bevan Sewell,2015-12-21 The US in the 1950s and 1960s wanted to prevent a new communist regime in the Western hemisphere at any cost Under President Eisenhower the US pursued a policy of support for dictators the economic shoring up of regimes that impoverished their own people and sanctioned direct interventions such as the overthrow of the Guatemalan government in 1954 When John F Kennedy came to power he promised a reset of relations and set about pouring aid into Latin America Yet in 1961 Kennedy also attempted to intervene in Central American domestic politics with the Bay of Pigs operation How far was each of the approaches pursued by the two administrations responsible for increasing tensions and encouraging radicalism on the continent In answering this question Bevan Sewell shows how Eisenhower s strategic stance on the Cold War became increasingly detrimental to Latin America over time and shows how similar policies were continued by the Kennedy administration The US and Latin America provides a new lens through which to assess US policy towards Latin America at an important time in inter American relations *Memorandum on Currency, 1913-1923* League of Nations,1924 Parliamentary Debates, House of the People India. Parliament. Lok Sabha,2012-11-30 **Guinea** International Monetary Fund. African Dept.,2013-07-03 This paper discusses Guinea s Second Review Under the Three Year Arrangement under the Extended Credit Facility Requests for Modifications of Performance Criteria and Waiver of Nonobservance of Performance Criterion and Financing Assurances Growth is projected at 4.5 percent for 2013 slightly lower than envisaged because of lower growth in the mining sector The programs inflation target has been revised upward slightly mainly reflecting the higher than programmed outcome at end 2012 together with some modest impact from an agreement on increases in civil service wages Key risks include continued political unrest in the run up to elections which could affect growth investment and reform momentum and a rebound in inflation if the private sector follows the increase in civil service wages **Analysing the Role of Energy Security in Promoting Third World Development** John Alobwede Ngome, Every scholar who reads this book will concur that at the heart of John s analysis is rooted a fundamental question and preoccupation that although Cameroon is naturally endowed with abundant and diverse energy resources the country however remains an energy poor state due to the absence of a durable Energy Security Plan political vision and political will all of which continue to hamper the development of a range of renewables alongside various fossil fuels to improve and guarantee durable Energy Security to catalyze development and reverse the current energy crisis Prof Dr Amelia Hadfield Head of Department of Politics University of Surrey United Kingdom **Austerity Ireland** Kieran Allen,Brian O'Boyle,2013-09-05 Ireland has been marketed as the poster boy of EU austerity EU elites and neoliberal commentators claim that the country s ability to suffer economic pain will attract investors and generate a recovery In Austerity Ireland

Kieran Allen challenges this official image and argues that the Irish state's response to the crash is typical of the Eurozone countries serving to protect the economic privilege of the powerful to the detriment of the middle and working classes. Looking at the various ways we could consider this austerity period a failure including transforming Ireland into a tax haven and contributing to serious levels of unemployment, Allen reveals the extent of Ireland's current socio-economic and political malaise suggesting that it may have created fertile ground for a leftist resurgence.

China's Anti-Monopoly Law Adrian Emch, David Stallibrass, 2013-07-01. It probably goes without saying that anti-monopoly law and practice are of very recent vintage in China. In August 2008, 118 years after the Sherman Act and 50 years after the Treaty of Rome, China's Anti-Monopoly Law (AML) came into effect. Since then, the enforcement of the AML has seen significant progress as well as considerable challenges. This volume, comprised of 27 highly informative contributions by more than 40 government officials, academics, economists, in-house lawyers, and private practitioners, introduces novice practitioners to the complexities of antitrust law in China and provides new insight for those already working in the field. Generally following the structure of the text of the AML, topics and issues covered include the following: an overview of the first five years of AML implementation; the institutional framework for antitrust enforcement in China; monopoly agreements between market players; abuses of dominance committed by a single company; problems and potential solutions for information exchanges between competitors; the economics underlying retail price maintenance; refusals to deal; procedural and substantive practice of merger decisions; the application of merger control to joint ventures; administrative monopolies; and the tension between competition and industrial policies; ways to seek legal redress; litigation, both administrative and civil; and the role of the courts; international cooperation efforts made in relation to Chinese antitrust enforcers; the relationship between the AML and China's anti-bribery rules; the treatment of vertical integration or cooperation; and how the AML rules apply to intellectual property rights. Throughout the book, there are analyses of major judgments with key conclusions to be drawn from them, as well as comparisons with corresponding judgments in other jurisdictions. This book is the first comprehensive analysis of the AML and as such will be of inestimable value to business persons and in-house counsel, as well as to academics in Chinese law and competition law from a global perspective.
