Organizing Bronze Age Societies Timothy Earle, Kristian Kristiansen, 2010-08-30 The Bronze Age was a formative period in European history when the organisation of landscapes settlements and economy reached a new level of complexity This book presents the first in depth comparative study of household economy and settlement in three micro regions the Mediterranean Sicily Central Europe Hungary and Northern Europe South Scandinavia The results are based on ten years of fieldwork in a similar method of documentation and scientific analyses were used in each of the regional studies making controlled comparisons possible The new evidence demonstrates how differences in settlement organisation and household economies were counterbalanced by similarities in the organised use of the landscape in an economy dominated by the herding of large flocks of sheep and cattle This book s innovative theoretical and methodological approaches will be of relevance to all researchers of landscape and settlement history **From Prehistoric Villages to Cities** Jennifer Birch, 2014-04-11 Archaeologists have focused a great deal of attention on explaining the evolution of village societies and the transition to a Neolithic way of life Considerable interest has also concentrated on urbanism and the rise of the earliest cities Between these two landmarks in human cultural development lies a critical stage in social and political evolution Throughout world at various points in time people living in small dispersed village communities have come together into larger and more complex social formations These community aggregates were essentially middle range situated between the earliest villages and emergent chiefdoms and states This volume explores the social processes involved in the creation and maintenance of aggregated communities and how they brought about revolutionary transformations that affected virtually every aspect of a society and its culture While there have been a number of studies that address coalescence from a regional perspective less is understood about how aggregated communities functioned internally The key premise explored in this volume is that large scale long term cultural transformations were ultimately enacted in the context of daily practices interactions and what might be otherwise considered the mundane aspects of everyday life How did these processes play out on the ground in diverse and historically contingent settings What are the strategies and mechanisms that people adopt in order to facilitate living in larger social formations What changes in social relations occur when people come together This volume employs a broadly cross cultural approach to interrogating these questions employing case studies which span four continents and more than 10 000 years of human history [Recent Research in the Prehistory of the Balkans](#) Dēmētrios V.
