La Croche Lune David D'HALLEINE, *Communication Against Domination* Max Hänska, 2021-04-12 This book tackles the philosophical challenge of bridging the gap between empirical research into communication and information technology and normative questions of justice and how we ought to communicate with each other It brings the question of what justice demands of communication to the center of social science research Max Hänska undertakes expansive philosophical analysis to locate the proper place of normativity in social science research a looming subject in light of the sweeping roles of information technologies in our social world today The book's first section examines metatheoretical issues to provide a framework for normative analysis while the second applies this framework to three technological epochs broadcast communication the Internet and networked communications and the increasing integration of artificial intelligence and machine learning technologies into our communication systems Hänska goes beyond the prevailing frameworks in the field by exploring how we answer normative questions and how our answer can change depending on our social context and the affordances of prevailing communications technologies This book provides an essential guide for scholars as well as graduate and advanced undergraduate students of research and theory in communication philosophy political science and the social sciences

The Politics of Social Media Manipulation Richard Rogers, Sabine Niederer, 2025-10-01 Disinformation and so called fake news are contemporary phenomena with rich histories Disinformation or the willful introduction of false information for the purposes of causing harm recalls infamous foreign interference operations in national media systems Outcries over fake news or dubious stories with the trappings of news have coincided with the introduction of new media technologies that disrupt the publication distribution and consumption of news from the so called rumour mongering broadsheets centuries ago to the blogosphere recently Designating a news organization as fake or der Lügenpresse has a darker history associated with authoritarian regimes or populist bombast diminishing the reputation of elite media and the value of inconvenient truths In a series of empirical studies using digital methods and data journalism the authors inquire into the extent to which social media have enabled the penetration of foreign disinformation operations the widespread publication and spread of dubious content as well as extreme commentators with considerable followings attacking mainstream media as fake

Capital and Ressentiment Joseph Vogl, 2022-10-27 The proliferation of social media has provided ideal conditions in which feelings of anger and frustration can be expressed and shared forming a deep pool of resentment that is being drawn upon and exploited by populist and authoritarian leaders In his new book Joseph Vogl shows how this dynamic is rooted in the fusing of finance capital and information in a new form of information capitalism that is reshaping the affective economy of our societies The capital accumulation strategies of powerful new platforms and social media are pushing people into fragmented opposing and conflictual communities where resentment is nurtured and grows The feelings of grievance and rejection generated by capitalism are redirected into attacks on migrants foreigners and others

thereby deflecting their critical potential and bolstering the system that is their source It is the cunning of resentment that provides the key to understanding why despite the profusion of communication in our social media age global finance and information capital can be neither understood nor attacked as a totalizing power This brilliant analysis of the ways in which information capitalism is transforming the affective economy of our societies will be of great interest to anyone concerned with the forces that are shaping our societies today **LiveJournal and Russian Disinformation** J.J. Sylvia IV, 2025-11-13 In *LiveJournal and Russian Disinformation* J.J. Sylvia IV analyzes the role of blogging platform LiveJournal in Russia's information warfare strategy examining its evolution and co-optation as a case study Through rigorous analysis Sylvia demonstrates how epistemic sabotage became central to the Kremlin's efforts to manipulate truth and more broadly how the ever increasing reach of the internet and social media platforms can be weaponized by authoritarian regimes to disrupt knowledge systems and destabilize democracies While the growing ubiquity of the internet and its networks have ushered in countless opportunities and benefits on individual organizational and international levels Sylvia emphasizes the double edged sword of the new risks that must be considered in turn As fascism is on the rise worldwide and anti democratic governments wield social media as a tool to stoke division and spread disinformation among citizens worldwide democratic countries being no exception he contends that understanding this tactical shift is critically relevant not only to the Russian context but also to the challenges of navigating truth and democracy on a global scale in the 21st century *LiveJournal and Russian Disinformation* coherently identifies documents and interprets the logics and implications of this evolution in warfare leaving readers with a more nuanced understanding of the platform as an early battle in a new digital arena one which is not likely to be the last [Search: Theory and Practice in Journalism Online](#) Murray Dick, 2013-08-30 Whether uncovering breaking stories finding reliable background information or finding the right contributors for stories and packages there is now a wealth of information available to journalists online but where to begin In *Search Theory and Practice in Journalism Online* Murray Dick provides a practical and theoretical overview of the journalistic research potential in various online tools Written by a leading expert in the field the book offers experience based guidance into online search for journalism Key features Up to date coverage of advanced search the invisible web social media multimedia and the verification of online material A critical overview of theory in online ethics verification and use of social media in journalism online Original research into search theory privacy trust and rights issues online Student friendly pedagogy based upon professional practice and informed by experts in online research *Search Theory and Practice in Journalism Online* is essential reading for undergraduate students of digital journalism online reporting and journalism studies [Canadian Almanac & Directory, 202](#) Grey House Canada, 2019-12 The Canadian Almanac Directory is the most complete source of Canadian information available cultural professional and financial institutions legislative governmental judicial and educational organizations Canada's authoritative sourcebook for almost 160 years the Canadian Almanac Directory gives you access to almost 100 000 names
