Decision Making: Social and Creative Dimensions C.M. Allwood, M. Selart, 2013-04-17 Decision making is a complex phenomenon which normally is deeply integrated into social life. At the same time the decision making process often gives the decision maker an opportunity for conscious planning and for taking a reflective stance with respect to the action considered. This suggests that decision making allows creative solutions with a potential to change the course of events both on an individual and a collective level. Given these considerations we argue that in order to more fully understand decision making the perspectives of different disciplines are needed. In this volume we have attempted to draw together contributions that would provide a broad view of decision making. Much work has been carried out in the writing and editing of this volume. First of all we would like to thank the contributors for their efforts in producing interesting and important texts and for their patience in the editorial process. Each chapter was edited by two or three reviewers. These reviewers are listed on a separate page in this book. Our heartfelt thanks go to them for their time and for their incisive and constructive reviews. We are also grateful to the publishing editors at Kluwer Academic Publishers, Christiane Roll and Dorien Francissen who have been generous with their encouragement and patience throughout the editorial process.

IP-Enabled Energy Management

Rob Aldrich, John Parelo, 2010-09-16 Extend Your Energy Management Capabilities Managing energy usage via a company network allows you to create an energy management program that can be scaled company wide and this unique book shows you just how to do it. Through step by step instruction and real world case studies drawn from the expert author team's own experience at Cisco this book lays out an IP based energy management strategy to optimize resources, dramatically increase energy savings and significantly reduce your carbon footprint. How do you establish energy management across multiple functions such as compute network and storage while preparing for building infrastructure convergence? How do you set up energy domains on a network? How do you bring this all together into one unified energy program then deploy it, manage it and measure results? Find the answers in this timely guide. Consider energy in terms of risk, cost and resource management. Gather raw data on where your company is now and set up benchmarking. Create strategies across multiple stakeholders and goals including facilities, IT security and sustainability. Establish and administer energy domains. Review the basics of energy accounting, measure results and set up reporting. See how to make your program sustainable and prepare for the future.

Challenges for Health and Safety in Higher Education and Research Organisations

Olga Kuzmina, Stefan Hoyle, 2020-11-19 This book provides a summary of the main obstacles for creating and maintaining high standards of health and safety in higher education and research organisations. The obstacles include high staff turnover and an uncertain and constantly evolving research environment, small groups lacking unified management structure, deadline time pressures, restricted funding models and existing old school culture. Often the Health and Safety specialists and personnel managers in these organisations find themselves reiterating the same information which gets lost as soon as the new cohort of workers

arrives Providing insight into methods of managing health and safety training and supervision which help to build a strong and reliable health and safety system this book is a collection of best practices from experienced safety professionals and researchers in Europe and the United States These experiences demonstrate how health and safety professionals have overcome these issues and provide readers with ideas and models they can use in their own organisations The information contained within is aimed at health and safety professionals and managers in universities and research organisations conducting scientific and engineering research with transient workers and students worldwide *Ohio University Bulletin*, 1988
