

## Government & the Economy

**Time Needed:** One class period

**Materials Needed:**

Student worksheets

Scissors and glue or tape

Power Point with projector (*optional*)

**Copy Instructions:**

Reading (2 pages; class set)

Review Worksheet (1 page; class set)

Graphic Organizer (2 pages side by side;

1 organizer per pair or trio of students)

Graphic Organizer Directions (1/2 page;

1 per pair or trio)

**Learning Objectives.** Students will be able to:

- Compare the government's role in free market, command, and mixed economies.
- Analyze the role of consumers, private producers, and the government in the U.S. mixed economy.
- Explain the effects of government policies on the free market.
- Describe how government policies allow either free or restricted trade.
- Identify U.S. laws and regulations adopted to promote economic competition.
- Identify U.S. laws protecting consumer rights and avenues of recourse.

## STEP BY STEP

- ☐ **ANTICIPATE** by asking students if they've ever seen an ad for cell phone service. What do they think makes one cell phone provider better than another? Then ask if they think the government ever gets involved in cell phone service. They likely won't know, but ask them to *guess* how the government *might* get involved.
- ☐ **DISTRIBUTE** the reading page to the class.
- ☐ **READ** the page with the class, pausing to discuss as appropriate.
- ☐ **CHECK** for understanding by doing the True/False active participation activity. Either follow the directions on the Active Participation Guide or run the Power Point.
- ☐ **PAIR** students together or put them in groups of three. (This activity is not designed for groups of more than three.)
- ☐ **DISTRIBUTE** the scissors and glue, one set of directions, and one two-page graphic organizer to each pair or trio.
- ☐ **REVIEW** the directions to make sure students understand what to do.
- ☐ **ALLOW** students to complete the graphic organizer.
- ☐ **GIVE** the review worksheet to those who finish (and ultimately to all students).
- ☐ **REVIEW** the answers to the graphic organizer activity as a class, either out loud or using the second part of the Power Point. If you have an interactive white board, you can also use the Power Point to fill in the graphic organizer together as a class.
- ☐ **ALLOW** students to work on the review worksheet if there's time.
- ☐ **CLOSE** by asking students to silently picture the graphic organizer in their minds. What were the three main categories? (government, consumers, and producers) What were the two main functions of government? (protect consumers and protect competition) Who were the consumers? (you!)

Making Sense of a Changing Economy Edward Nell, 2005-08-08 In Making Sense of Economics Edward Nell presents an unorthodox and original view of the current state of economic theory and policies Deriding the general trend for econobabble the author explains the reason why conventional wisdom in economics now seems irrelevant and looks to likely future scenarios Entertaining throughout Nell employs a lightness of touch and wit not generally associated with economic literature It is an accessible and enjoyable read which requires minimal prior knowledge of economics It will appeal to those who care what is really happening in the economy

**The Illusion of Free Markets** Bernard E. Harcourt, 2012-11-12 It is widely believed today that the free market is the best mechanism ever invented to efficiently allocate resources in society Just as fundamental as faith in the free market is the belief that government has a legitimate and competent role in policing and the punishment arena This curious incendiary combination of free market efficiency and the Big Brother state has become seemingly obvious but it hinges on the illusion of a supposedly natural order in the economic realm The Illusion of Free Markets argues that our faith in free markets has severely distorted American politics and punishment practices Bernard Harcourt traces the birth of the idea of natural order to eighteenth century economic thought and reveals its gradual evolution through the Chicago School of economics and ultimately into today's myth of the free market The modern category of liberty emerged in reaction to an earlier integrated vision of punishment and public economy known in the eighteenth century as police This development shaped the dominant belief today that competitive markets are inherently efficient and should be sharply demarcated from a government run penal sphere This modern vision rests on a simple but devastating illusion Superimposing the political categories of freedom or discipline on forms of market organization has the unfortunate effect of obscuring rather than enlightening It obscures by making both the free market and the prison system seem natural and necessary In the process it facilitated the birth of the penitentiary system in the nineteenth century and its ultimate culmination into mass incarceration today

Luttwak, Weidenfeld & Nicolson, 1999-02-17 In this incisive critical analysis of today's free market capitalism

Edward Luttwak shows how it is vastly different from the controlled capitalism that flourished so successfully from 1945 to the 1980s. Turbo capitalism is private enterprise liberated from government regulation unchecked by effective trade unions unfettered by concerns for employees or investment restrictions and unhindered by taxation. It promises a dynamic expanding economy and new wealth. The winners, the architects and acrobats of techno-organizational change, become much richer; the losers, the majority, become relatively or absolutely poorer and are forced by downsizing to take the traditional jobs of the underclass, more and more of whom end up in prison. Edward Luttwak challenges the conventional wisdom that jobs lost in old industries will be replaced by jobs in new ones. If General Motors fires you, Microsoft will not hire you; instead, you'll be working in services, often poorly paid. Led by the United States, closely followed by Britain, turbo capitalism is spreading fast throughout Europe, Asia, and the rest of the world. Only in France and Japan is there any resistance without the two great forces that check its enormous power in the United States: a powerful legal system and the stringent rules of American Calvinism. Acknowledging the great efficiency of turbo capitalism, Luttwak provides no solutions but describes in powerful detail the major societal upheavals and inequities it causes and the broad dissatisfaction and anxiety that may result. He suggests this is a high price to pay for this great dilemma of our times. They call it the free market, but that is shorthand for much more than the freedom to buy and sell. What they celebrate, preach, and demand is private enterprise liberated from government regulation unchecked by effective trade unions, unfettered by sentimental concerns over the fate of employees or communities, unrestrained by customs barriers or investment restrictions, and molested as little as possible by taxation. What they insistently demand is the privatization of state-owned businesses of all kind and the conversion of public institutions from universities and botanical gardens to prisons, from libraries and schools to old age homes into private enterprises run for profit. What they promise is a more dynamic economy that will generate new wealth while saying nothing about the distribution of any wealth, old or new. They call it the free market, but I call it turbo capitalism because it is so profoundly different from the strictly controlled capitalism that flourished from 1945 until the 1980s and that brought the sensational novelty of mass affluence to the peoples of the United States, Western Europe, Japan, and all other countries that followed their paths.

Edward Luttwak      **Making Sense Changing Economy** Edward John Nell, Nell E Staff, 1996      Making Sense of a Changing Economy Edward John Nell, 1996      *The Invisible Hand?* B. J. P. van Bavel, 2016

The Invisible Hand offers a radical departure from the conventional wisdom of economists and economic historians by showing that factor markets and the economies dominated by them, the market economies, are not modern but have existed at various times in the past. This work analyses three major pre-industrial examples of successful market economies in western Eurasia: Iraq in the early Middle Ages, Italy in the high Middle Ages, and the Low Countries in the late Middle Ages and the early modern period. It then draws parallels to England and the United States in the modern period. These areas successively saw a rapid rise of factor markets and the associated dynamism followed by stagnation, which enables an in-depth investigation of the causes and

results of this process     *The Surprising Design of Market Economies* Alex Marshall, 2012-09-01 The free market has been a hot topic of debate for decades Proponents tout it as a cure all for just about everything that ails modern society while opponents blame it for the very same ills But the heated rhetoric obscures one very important indeed fundamental fact markets don't just run themselves we create them Starting from this surprisingly simple yet often ignored or misunderstood fact Alex Marshall takes us on a fascinating tour of the fundamentals that shape markets and through them our daily economic lives He debunks the myth of the free market showing how markets could not exist without governments to create the structures through which we assert ownership of property real and intellectual and conduct business of all kinds Marshall also takes a wide ranging look at many other structures that make markets possible including physical infrastructure ranging from roads and railroads to water systems and power lines mental and cultural structures such as common languages and bodies of knowledge and the international structures that allow goods services cash bytes and bits to flow freely around the globe Sure to stimulate a lively public conversation about the design of markets this broadly accessible overview of how a market economy is constructed will help us create markets that are fairer more prosperous more creative and more beautiful     **How an Economy Grows and Why It Crashes** Peter D.
