Mathematics education in the United States can reproduce social inequalities whether schools use either basic skills
curricula to prepare mainly low income students of color for low skilled service jobs or standards based curricula to ready
students for knowledge intensive positions And working for fundamental social change and rectifying injustice are rarely
included in any mathematics curriculum Reading and Writing the World with Mathematics argues that mathematics education
should prepare students to investigate and critique injustice and to challenge in words and actions oppressive structures and
acts Based on teacher research the book provides a theoretical framework and practical examples for how mathematics
educators can connect schooling to a larger sociopolitical context and concretely teach mathematics for social justice For
