

- Air at 45°C and 10% relative humidity is to be humidified adiabatically to 60% relative humidity. Use the psychrometric chart to obtain the following numbers:
 - (5 points) The dry bulb and adiabatic saturation temperature of the final air.
 - (5 points) The dew point of the final air
 - (5 points) The absolute humidity and humid volume of final air.
 - (5 points) The rate at which water must be added to humidify 15m³/min of the entering air.
- (20 points) Two aqueous sulfuric acid solutions containing 20.0 wt% H₂SO₄ (specific gravity=1.139) and 60.0 wt % H₂SO₄ (specific gravity=1.498) are mixed to form a 4.00 molar solution (specific gravity=1.213). Assuming 100 kg of 20% solution as the basis calculate:
 - (10 points) the mass fraction of sulfuric acid in the product solution.
 - (10 points) the feed ratio (liters of 20% solution/liter of 60% solution).
- (30 points) A rotary dryer operating at atmospheric pressure dries 10 tons/day of wet grain at 70°F, from a moisture content of 10% to 1% moisture. The air flow is countercurrent to the flow of grain, enters at 225°F dry bulb and 110°F wet-bulb temperature, and leaves at 125°F dry-bulb (see figure).

Determine: (a) the humidity of entering and leaving air if the latter is saturated, (b) the water removal in pounds per hour, (c) the daily product output in pounds per day, and (d) the heat input to the dryer. Assume that there is no heat loss from the dryer, that the grain is discharged at 110°F, and that its specific heat is 0.18.

- (30 points) A fuel gas containing 85 mole % methane and the balance ethane is burned completely with pure oxygen at 25 °C at 1atm. Suppose the reactor is continuous. Take a basis of calculation of 1 mol/s of the fuel gas, combusted with stoichiometric amount of oxygen.
 - (10 points) Please calculate the rate at which heat must be transferred from the reactor if the products are brought back down to 25 °C.
 - (15 points) Please calculate the final temperature of the combustion gas if the process is under adiabatic condition at constant pressure 1atm.
 - (5 points) Please calculate the final volume of the combustion gas if the process is under adiabatic condition at constant pressure 1atm. If the volume of the reactor can only be constant and the pressure can change, what do you expect to happen to the reactor?

Memorandum Of Final Exam 2014

**Carrie Meyerhoff, Catherine
Reed, Valerie Were, Susan Von Mosch**

Memorandum Of Final Exam 2014:

Memorandum on Behalf of Defendant Harold J. Elling, 1942 *The Education Invasion* Joy Pullmann, 2017-03-14

Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation s schools Who benefits And how can citizens regain local self governance in education so their children s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies The Internal Revenue Service's Processing of 501(c)(3) and 501(c)(4) Applications for Tax-exempt Status Submitted by "political Advocacy" Organizations from 2010-2013 United States. Congress. Senate. Committee on Finance, 2015 **From Stress to Growth** Marcus Noland, Donghyun Park, 2015

Examines such phenomena as the dominance of state owned banks the growth of non bank lending the so called shadow banks and the need to develop local bond markets new financial centers and stronger supervisory tools to prevent dangerous real estate asset bubbles **Rescuing Soldiers of Misfortune** Evan R. Seamone, 2018-12-06 This unique book concerns those veteran inmates who have failed to complete a readjustment process and who continue to wage their own personal wars to regain a sense of normalcy those veterans who have not yet redeployed home from combat even though they have relocated to the inherently traumatizing confinement setting Aside from identifying factors that will help those seeking to be aware of the unique problems of incarcerated veterans and those advocating for them the book attempts to help these individuals as well as correctional professionals understand veteran inmates and their unique needs which stem from military service The text offers that programs must be implemented flexibly despite operational and budgetary challenges The book clearly provides guidelines to develop relevant programs that do far more than simply warehouse troublesome individuals Major topics include components of veterans readjustment military discipline and military discharge the relationship between military service and crime criminal manifestations of military service war zone deployment and combat trauma veterans

benefits and outreach during incarceration popular approaches to divert veterans from confinement attributes of veterans groups in confined settings institutionally based programs for veterans veterans dorms and urgency in the preparation for the coming storm of veteran offenders This book which represents years of research and the author s experience as a military lawyer in both prosecution and defense is an important reference for a variety of readers including law enforcement and first responders corrections professionals mental health providers lawyers judges and anyone who desires to understand the challenges faced by military veterans in conflict with the law

Inside the Cell Erin E. Murphy, 2015-10-06 a version less likely to play out on dramatic television shows In Inside the Cell Erin Murphy shows how DNA typing can be subject to misuse mistake and error and lead to a police state run amok Murphy shows the perils of a society in which stop and frisk becomes stop and spit or in which police pose undercover to get a DNA sample from your discarded lunch Already police can collect DNA when making an arrest sometimes before charging a person with a crime The government is building a massive DNA database stockpiling samples from as much as a third of the male population and the laws regulating what they can and cannot do with them are weak Murphy shows how this invites the riskiest kind of genetic surveillance imaginable Just because DNA testing is good science does not mean that it is foolproof Faulty forensic science is the number two factor leading to wrongful conviction and yet we have done little to improve the use of science in criminal justice
