We Could Not Fail Richard Paul, Steven Moss, 2015-05-01 This surprising and insightful history profiles ten African American engineers, mathematicians, and others who worked for NASA's space program. Lauren Helmuth, New York Times Book Review. The Space Age began just as the struggle for civil rights forced Americans to confront the bitter legacy of slavery, discrimination, and violence against African Americans. NASA itself became an agent of social change with President Kennedy opening its workplaces to African Americans. In *We Could Not Fail*, Richard Paul and Steven Moss profile ten pioneer African American space workers whose stories illustrate the role NASA and the space program played in promoting civil rights. Paul and Moss recount how these technicians, mathematicians, engineers, and an astronaut candidate surmounted barriers and navigated being the sole African American in a NASA work group. These brave and determined men went on to help transform Southern society by integrating colleges, patenting new inventions, holding elective office, and reviving and governing defunct towns. Adding new names to the roster of civil rights heroes and a new chapter to the story of space exploration, *We Could Not Fail* demonstrates how African Americans broke the color barrier by competing successfully at the highest level of American intellectual and technological achievement. But Will It Fly? Iver P. Cooper, 2025-09-17 Conventional aircraft today are propelled by the action of propellers or jets and powered by the internal combustion of petroleum fuels in piston, turboprop, or jet engines. But other power sources, powerplants, and propulsion devices for airships as well as aircraft have been proposed and even experimented with over the last few centuries. The power sources considered include human muscles, steam, batteries, nuclear reactors, and hydrogen fuel, and the propulsion devices include sails, oars, flapping wings, rockets, and cycloidal propellers. This meticulously researched book presents the history of these unconventional aerial power and propulsion systems, explains the underlying science and technology behind them, and assesses the crucial question of practicality. [Breaking Point](#) Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK. This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. *Breaking Point* is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories, and the author's personal interviews and correspondence over years with key psychiatric and military policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre- and post-induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter. While many American and European psychiatrists questioned this belief, and huge numbers of American psychiatric casualties soon raised

questions about screening's validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected

Fractivism Sara Ann Wylie, 2018-01-25 From flammable tap water and sick livestock to the recent onset of hundreds of earthquakes in Oklahoma the impact of fracking in the United States is far reaching and deeply felt In Fractivism Sara Ann Wylie traces the history of fracking and the ways scientists and everyday people are coming together to hold accountable an industry that has managed to evade regulation Beginning her story in Colorado Wylie shows how nonprofits landowners and community organizers are creating novel digital platforms and databases to track unconventional oil and gas well development and document fracking's environmental and human health impacts These platforms model alternative approaches for academic and grassroots engagement with the government and the fossil fuel industry A call to action Fractivism outlines a way forward for not just the fifteen million Americans who live within a mile of an unconventional oil or gas well but for the planet as a whole Colorado School Laws Colorado, 2015
