# Memorandum Feb March 2015 Mathematics

**Mike Jess**

## **Memorandum Feb March 2015 Mathematics:**

**Pathways to Reform** Alexandra W. Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation's third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In Pathways to Reform Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation Pathways to Reform provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid

*Applications of Operational Research and Mathematical Models in Management* Miltiadis Chalikias, 2020-11-17 This book *Applications of Operational Research and Mathematical Models in Management* includes all the papers published in the Mathematics Special Issue with the same title All the published papers are of high quality and were subjected to rigorous peer review Mathematics is included in the Science Citation Index Web of Science and its current Impact Factor is 1.747 The papers in this book deal with on R D performance models methods for ranking the perspectives and indicators of a balance scorecard robust optimization model applications integrated production and distribution problem solving demand functions supply chain games probabilistic optimization and profit research coordinated techniques for order preference robustness approaches in bank capital optimization and hybrid methods for tourism demand forecasting All the papers included contribute to the development of research

*Diversity, Inclusion, Equity and the Threat to Academic Freedom* Martín López-Corredoira, 2022-09-05 There can be no doubt that discrimination based on sex race ethnicity religion or beliefs should not be tolerated in academia Surprisingly however in recent years policies of Diversity Inclusion and Equity DIE officially introduced to counteract discrimination have increasingly led to quite the opposite result the exclusion of individuals who do

not share a radical woke ideology on identity politics feminism other gender activisms critical race theory etc and to the suppression of the academic freedom to discuss such dogmas This subversion of academia disguised Trojan horse style as universal human rights advocacy is unacceptable because academia must be politically neutral and protect freedom of speech a cornerstone of professional scholarly activity without which universities as we know them will slowly but surely suffocate Our purpose here is to put together some particularly illustrative cases of such repression in a single book testifying to a ubiquitous trend within western culture irreducible to a few isolated complaints The essays contained here illustrate the abuse of power censorship and witch hunts at many universities and research centres in the name of DIE List of coauthors in alphabetical order Dorian Abbot Tomonori Agoh Gerhard Amendt Ivar Arpi David Benatar Peter Boghossian Civitas Research Team David D az Pardo de Vera Pedro Domingos Janice Fiamengo tienne Forest Jorge Gibert Galassi Norman Goldstuck Jos L Gonz lez Quir s Lawrence M Krauss Patrick LaBelle Mart n L pez Corredoira Heather Mac Donald Martin Malmgren Jordan Peterson Constantin Polychronakos Erik J Olsson Philip C Salzman Alessandro Strumia Tom Todd Andrei Yafaev *Proceedings of the 13th International Congress on Mathematical Education* Gabriele Kaiser,2017-10-31 This book is open access under a CC BY 4 0 license The book presents the Proceedings of the 13th International Congress on Mathematical Education ICME 13 and is based on the presentations given at the 13th International Congress on Mathematical Education ICME 13 ICME 13 took place from 24th 31st July 2016 at the University of Hamburg in Hamburg Germany The congress was hosted by the Society of Didactics of Mathematics Gesellschaft f r Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI ICME 13 brought together about 3 500 mathematics educators from 105 countries additionally 250 teachers from German speaking countries met for specific activities Directly before the congress activities were offered for 450 Early Career Researchers The proceedings give a comprehensive overview on the current state of the art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching and learning processes The book introduces the major activities of ICME 13 namely articles from the four plenary lecturers and two plenary panels articles from the five ICMI awardees reports from six national presentations three reports from the thematic afternoon devoted to specific features of ICME 13 Furthermore the proceedings contain descriptions of the 54 Topic Study Groups which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops The additional important activities of ICME 13 namely papers from the invited lecturers will be presented in the second volume of the proceedings **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations,2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events **Business Mathematics** Karl J.
