Lenders, 2006 Visions of nature are the ideas that people hold of what nature is and how we should relate to it These visions are important for the design of democratically grounded landscape and nature policies These contributions were presented at an expert meeting at Radboud University June 2001 Flourishing Within Limits to Growth Sven Erik Jørgensen, Brian D. Fath, Søren Nors Nielsen, Federico M. Pulselli, Daniel A. In Search of Just Families Chhanda Gupta,2018-06-06 This book explores two contemporary combative views regarding the search for just families These views arise from the conundrum of the family being seen as a supportive nurturing haven versus a grievously unjust harmful institution that violates the rights and freedoms of any individual family member Triggered by anti family movements which have been inspired by the ideas of some theorists and writers the book addresses the question Is family destined to wither away It challenges the radical idea that the solution to the problem of unjust families is their complete replacement by purportedly just anti familial alternatives Chhanda Gupta advances a distinct reformist and reconciliatory view that the expulsion of either side of the family anti family binary is not the answer She seeks to syncretize the seemingly irreconcilable ideas propagated through that philosophical binary Furthermore she urges that the search for just families must find its answer in clarifying how the term just applies to the characters behaviors and attitudes of people who comprise actual families The search is not for a perfectly just society or polity or even for a perfectly just family Instead it is a search for ways to redress the remediable injustices that occur in families in order to benefit and uplift individuals and families and the societies in which they live      **An Introduction to the Study of Society** Frank Hamilton Hankins,1928
