 - a. "The role of the nurse is to administer medications and other treatments prescribed by your physician."
 - b. "In addition to caring for you while you are sick, the nurses will help you plan to maintain your health."
 - c. "The nurse's job is to collect information and communicate any problems that occur to the physician."
 - d. "Nurses perform many of the same procedures as the physician, but nurses are with the patients for a longer time than the physician."

ANS: B

The American Nurses Association (ANA) definition of nursing describes the role of nurses in promoting health. The other responses describe dependent and collaborative functions of the nursing role but do not accurately describe the nurse's unique role in the health care system.

 - c. "Research from all published articles are used as a guide for planning patient care."
 - d. "Recommendations are based on research, clinical expertise, and patient preferences."

ANS: D

Clinical judgment based on the nurse's clinical experience is part of EBP, but clinical decision making should also incorporate current research and research-based guidelines. Evaluation of patient outcomes is important, but data analysis is not required to use EBP. All published articles do not provide research evidence; interventions should be based on credible research, preferably randomized controlled studies with a large number of subjects.

DIF: Cognitive Level: Understand (Comprehension)

TOP: Nursing Process: Planning

MSC: NCLEX: Safe and Effective Care Environment

3. Which statement by the nurse provides a clear explanation of the nursing process?
