**Parallel and Distributed Processing and Applications** Jiannong Cao, Laurence T. Yang, Minyi Guo, Francis Lau, 2005-01-17 Welcome to the proceedings of the 2nd International Symposium on Parallel and Distributed Processing and Applications ISPA2004 which was held in Hong Kong China 13-15 December 2004. With the advance of computer networks and hardware technology, parallel and distributed processing has become a key technology which plays an important part in determining future research and development activities in many academic and industrial branches. It provides a means to solve computationally intensive problems by improving processing speed. It is also the only approach to building highly reliable and inherently distributed applications. ISPA2004 provided a forum for scientists and engineers in academia and industry to exchange and discuss their experiences, new ideas, research results, and applications about all aspects of parallel and distributed computing. There was a very large number of paper submissions: 361 from 26 countries and regions including not only Asia and the Pacific but also Europe and North America. All submissions were reviewed by at least three program or technical committee members or external reviewers. It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions. In order to allocate as many papers as possible and keep the high quality of the conference, we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations. We believe that all of these papers and topics not only provide novel ideas, new results, work in progress, and state-of-the-art techniques in this field but also stimulate future research activities in the area of parallel and distributed computing with applications.

**Healing and Peacebuilding after War** Julianne Funk, Nancy Good, Marie E. Berry, 2020-05-27. This book brings together multiple perspectives to examine the strengths and limitations of efforts to promote healing and peacebuilding after war, focusing on the aftermath of the traumatic armed conflict in Bosnia and Herzegovina. This book begins with a simple premise: trauma that is not transformed is transferred. Drawing on multidisciplinary insights from academics, peace practitioners, and trauma experts, this book examines the limitations of our current strategies for promoting healing and peacebuilding after war while offering inroads into best practices to prevent future violence through psychosocial trauma recovery and the healing of memories. The contributions create a conversation that allows readers to critically rethink the deeper roots and mechanisms of trauma created by the war. Collectively, the authors provide strategic recommendations to policymakers, peace practitioners, donors, and international organizations engaged in work in Bosnia and Herzegovina, strategies that can be applied to other countries rebuilding after war. This volume will be of much interest to students of conflict resolution, peacebuilding, social psychology, Balkan politics.
