Extending the Complexity of the Leaky Pipeline Phenomenon in Natural Science Anna Wolfram,2023-10-19 In the realm of global innovation STEM powers knowledge based societies However ongoing gender disparities curtail the complete utilisation of human capital As argued in the goal congruity theory women s choices to communal goals prompts female exits from STEM Exploring this theory in natural science and academia two questions arise 1 Does the leaky pipeline persist and where are gaps 2 Do female scientists leave to afford other goals Stats show early career gender balance but senior positions lack women Notably men dominate decision making roles Qualitative research with 26 female scientists reveals an overall positive and communal perception of natural science and academia Moreover the perceived affordance of communal values within science majorly contributes to the desire of female researchers to continue pursuing an academic path These findings contradict the literature established goal congruity theory and thus provide an experienced based foundation to extend the complexity of the leaky pipeline phenomenon in natural science Heredity under the Microscope Soraya de Chadarevian,2020-07-02 By focusing on chromosomes Heredity under the Microscope offers a new history of postwar human genetics Today chromosomes are understood as macromolecular assemblies and are analyzed with a variety of molecular techniques Yet for much of the twentieth century researchers studied chromosomes by looking through a microscope Unlike any other technique chromosome analysis offered a direct glimpse of the complete human genome opening up seemingly endless possibilities for observation and intervention Critics however countered that visual evidence was not enough and pointed to the need to understand the molecular mechanisms Telling this history in full for the first time Soraya de Chadarevian argues that the often bewildering variety of observations made under the microscope were central to the study of human genetics Making space for microscope based practices alongside molecular approaches de Chadarevian analyzes the close connections between genetics and an array of scientific medical ethical legal and policy concerns in the atomic age By exploring the visual evidence provided by chromosome research in the context of postwar biology and medicine Heredity under the Microscope sheds new light on the cultural history of the human genome *Antibody-mediated autoimmune diseases of the CNS: Challenges and approaches to diagnosis and management* Mei-Ping Ding,Wei Qiu,Long-Jun Wu,Hongzhi Guan,2022-03-21 **Yearbook of International Organizations 2013-2014 (Volumes 1a-1b)** Union Of International Associations,Union of International Associations,2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events *Annual Report of School District No. 1, Multnomah County, Oregon, Including the City of Portland, for the Year Ending ...* Portland Public Schools (Or.),1910 **Neurobiology of Disease** Michael V Johnston,Harold P Adams,Ali Fatemi,2016-08-18 The second edition of Neurobiology of Disease includes nearly 200 articles surveying all major disorders of the nervous system in both adults and children focusing on relevant diagnosis and treatments from the perspective of cutting edge clinical and basic neurobiological research Akin to an encyclopedia of
