✓ Exclusively available on IvyPanda

Butler, A., Lieshout, R. J. V., Lipman E. L., MacMillan, H. L., Gonzalez, A., Gorter, J. W., Georgiades, K., Speechley, K. N., Boyle, M. H., & Ferro, M. A. (2018). Mental disorder in children with physical conditions: a pilot study. *Schulich Medicine & Dentistry*.

Alexandra Butler has been a member of the COMPASS system since 2014. She participates in numerous studies of the mental health of young people, their socialization in the school environment, and the necessary practices for their adaptation. This paper describes the characteristics and quality of life of children with mental health and particular physical disabilities such as multimorbidity. The part about the child's physical condition can be excluded due to the irrelevance of the dyslexia topic. However, the detailed description of the psycho-emotional component shows well any mental illness from the mental side. The study can contribute to the analysis of the connection between the physical and mental conditions of children. It also describes the practices needed to diagnose and maintain normal living circumstances for such children.

Elliot, J. G. (2020). It's time to be scientific about dyslexia. *Special Issue: The Science of Reading: Supports, Critiques, and Questions*, 55(1), 61-65.

Julian J. Elliott is a professor and director of Collingwood College, Durham University, and is involved in interdisciplinary research in psychology. The author of the paper offers an alternative opinion that the phenomenon of dyslexia is still underestimated by society and insufficiently scientifically verified, despite numerous studies in recent years. This statement should be considered, as there is always a risk of ignorance and inappropriate treatment of children with learning disabilities due to the lack of knowledge. There are multiple cases when the disease of dyslexia is unintentionally confused with some ordinary negligence and does not receive proper control and assistance in the class. All further work should be aimed at instructing people on this topic and reducing the risks of improperly educating dyslexic children.

Franzen, L., Stark, Z., & Johnson, A. P. (2021). Individuals with dyslexia use a different visual sampling strategy to read text. *Scientific reports*, 11(6449).
