Le Singe Dactylographe:

L'équation de la chauve-souris Mickaël Launay, Chloé Bouchaour, 2024-10-16 Le nouveau best seller de Mickaël Launay mathématicien spécialiste de la vulgarisation scientifique qui nous explique de façon claire et précise la physique quantique Il faut apprendre observer le monde l'on ne l'attend pas Pourquoi le jus d'orange monte-t-il dans la paille quand on aspire Est-on toujours la même personne vingt ans après Pourquoi est-il si difficile de prédire la météo un mois à l'avance Et pourquoi y a-t-il plusieurs touches la sur un piano Autant de questions pas si anodines qui si on les creuse nous entraînent renverser ce que nous croyons savoir du monde Vous voyez le train d'accélérer Mais c'est le ventre qui recule La nature est pleine d'illusions elle brouille les pistes laisse voir l'inverse de ce qui est Alors comment démentir tout ça De la poussée d'Archimède la physique quantique en passant par la théorie des embouteillages la cuisson des coquillettes ou encore la propagation des ondes il nous faudra parfois oublier nos videntes pour embrasser d'inconfortables incertitudes Dans ce voyage renversant aux frontières ambiguës de notre compréhension les belles mathématiques surgissent des expériences farfelues et les petites questions sans prétention sont les premières pierres sur lesquelles se bâtissent les grandes théories Pour embarquer suivez la chauve-souris
