Culture and Enlightenment Paul Crittenden, 2017-11-22 This title was first published in 2002 Culture and Enlightenment are the two words that best characterise the essence of Gyrgy Markus's career in whose honour this book is published Markus devoted the last twenty years of research towards a theory of cultural objectifications and their pragmatics and the great depth of his knowledge of the history of culture and philosophy informs all his teaching and writing The pursuit of Enlightenment ideals attains reflective self consciousness in Markus works forged in the knowledge of its own historicity of the embeddedness of rationalities in culture and in an awareness of the paradoxes that cling to the conscious affirmation of ideals which are no longer self evident or beyond questioning In taking up the challenge of these paradoxes Markus spans the whole history of modern philosophy and culture with a matchless authority This book draws together contributions from leading figures in contemporary philosophy who are also friends colleagues and former students of Gyrgy Markus The book is divided into two sections the first presents critical assessments of various aspects of Markus wide ranging works the second presents contributions in celebration of his influence and his wide interests In their critical assessment of Markus work and in the demonstration of his influence the contributors hope to convey something of the breadth and something of the excitement of doing philosophy in the company of Gyrgy Markus

The Idea of Democracy in the Modern Era

Ralph Ketcham, 2004 Although the last half of the twentieth century has been called the Age of Democracy the twenty first has already demonstrated the fragility of its apparent triumph as the dominant form of government throughout the world Reassessing the fate of democracy for our time distinguished political theorist Ralph Ketcham traces the evolution of this idea over the course of four hundred years He traces democracy's bumpy ride in a book that is both an exercise in the history of ideas and an explication of democratic theory Ketcham examines the rationales for democratic government identifies the fault lines that separate democracy from good government and suggests ways to strengthen it in order to meet future challenges Drawing on an encyclopedic command of history and politics he examines the rationales that have been offered for democratic government over the course of four manifestations of modernity that he identifies in the Western and East Asian world since 1600 Ketcham first considers the fundamental axioms established by theorists of the Enlightenment Bacon Locke Jefferson and reflected in America's founding then moves on to the mostly post Darwinian critiques by Bentham Veblen Dewey and others that produced theories of the liberal corporate state He explains late nineteenth century Asian responses to democracy as the third manifestation grounded in Confucian respect for communal and hierarchical norms followed by late twentieth century postmodernist thought that views democratic states as oppressive and seeks to empower marginalized groups Ketcham critiques the first second and fourth modernity rationales for democracy and suggests that the Asian approach may represent a reconciliation of ancient wisdom and modern science better suited to today's world He advocates a reorientation of democracy that de-emphasizes group or identity politics and restores the wholeness of the civic community
