## The Special-T Press (formerly the Spar-T Press)

The Special-T Press features a unique 8-position turret top that allows you to mount each reloading die in its most convenient sequence.

You may also mount your powder measure in one of the die stations if it is compatible with the 7/8" x 14 threads (as shown). The Lyman #55 Measure may be turret-mounted by using a 7/8" x 14 adapter available from Lyman.

### Mounting the Press

Remove the Special-T Press from the packing box and position it against the edge of the bench top in the most convenient location (usually near the center of the bench, leaving a work area on each side of the press). As you face the press, the word "Lyman" will be on the left side. Mark the position of the mounting holes and drill them there, using 3/8 inch holes, securely anchor the press.

### Two Operating Positions

The press can work in either of two ways - with the toggle assembly in the down-stroke position, the way the Special-T Press is assembled at the factory, or converted to the optional up-stroke position. We suggest you try the factory recommended down-stroke position. After some use, you may easily change the operation to the up-stroke position.

### Up-Stroke vs. Down-Stroke

In the down-stroke position, the handle is pushed down to activate the ram and raise the cartridge case up into the die. Most reloaders prefer this method. In the up-stroke position, the operator may stand and, by pulling with both hands, exert pressure on the handle much greater than his own body weight. This degree of force is seldom needed to reload cartridges, however.

### Down-Stroke Installation

The Special-T Press is factory assembled so the toggle is in the down-stroke position.

Note: The angled corner of the toggle arm will be facing you as indicated in Figure 8.

### Up-Stroke Installation

Should you desire to use the press in the up-stroke position (as you push up on the handle, the case moves up to make contact with the reloading die) follow the same directions as

Figure 8
