Business Negotiations in China Henry K. H. Wang, 2017-11-22 Business

Negotiations in China provides a holistic overview of the institutional organisational and cultural issues that underpin successful business negotiations in China. Good negotiation strategies and management are essential for establishing successful business deals and new ventures in China. The author addresses the current key issues and risks, high level business management planning, innovative approaches and modern negotiation strategies. The text opens with a review of the evolution of key negotiation models that have been used in China right up to the most current. This is followed by an analysis of the various negotiation frameworks and processes being undertaken in China, their similarities and differences with other global negotiation processes. Alongside the negotiation itself, the author provides advice on selection of the negotiation team and the various strategic roles within it, the detailed preparations and analysis required prior to starting negotiations in China, effective management strategies for each of the various stages of negotiation to achieve successful, sustainable outcomes. *Business Negotiations in China* is supported by examples and analysis drawn from actual high level business negotiations by leading international companies with China State Owned Enterprises. It also explores the fierce competition between multinationals and China state owned companies and their respective different negotiation strategies. This book is an important indispensable insider's guide to the strategy and practice of negotiating in China and is relevant to professionals, academics, researchers and students alike. *BRICS and International Tax Law* Peter Antony Wilson, 2016-04-24

With the ongoing expansion of outbound foreign direct investment (FDI) in the countries representing the BRICS economic bloc (Brazil, Russia, India, China and South Africa) and with all of them at the same time listed among the top seven countries plagued by tax evasion and avoidance in the guise of illicit outflows, the five governments both individually and through cooperative initiatives have devised new international tax strategies that are proving to be of great interest and value to other countries both developing and developed. The core of these strategies addresses the necessity of stemming the outflow of revenue while strongly supporting FDI both inbound and outbound while complying with international obligations including those arising from human rights laws. This book is the first in-depth commentary on this new and evolving area of international tax law. The detailed analysis covers the entire field of BRICS international tax law, considering topics such as the following: information exchange procedures and pitfalls; response to the OECD's Base Erosion and Profit Shifting (BEPS) initiative; role of bilateral and multilateral double taxation conventions including the Multilateral Instrument and the Bilateral Investment Treaties; thin capitalization; transfer pricing; controlled foreign corporation rules; shortcomings related to authorities; limited manpower; international audit and investigation procedures; the BRICS approach to residence and mandatory and binding arbitration; and the BRICS approach to shaping the developing world's international tax system. Notably, the author personally conducted interviews with senior international representatives of the BRICS tax authorities as well as with leading BRICS academics and practitioners. Tax cases together with human rights and investment cases and administrative guidelines in all five countries are also included in the analysis. The study concludes with recommendations for

improving each of the ve countries tax law and procedures especially in the area of dispute resolution The author s goal is to extend the existing body of knowledge of the BRICS international tax laws in order to assist in developing an understanding of the BRICS approach to dealing with evasion and avoidance an approach which facilitates both outbound and inbound FDI simpli es tax authority administration and establishes a basis for resolving international disputes which is compatible with sovereignty In achieving this objective the author has produced a major work that is of immeasurable value to tax advisers government and governance of cials academics and researchers both in developing international taxation strategies and in helping to resolve disputes with tax authorities **Annual Report** Philippines.
