Isizulu Paper Dbe:

Innovations in online teaching and learning Judah P. Makonye, Nokulunga S. Ndlovu, 2023-03-01 This book's research is on online pedagogical approaches devised by teacher educators and researchers to circumvent a face to face curriculum delivery during the COVID 19 pandemic. The challenge faced by educators was that they were uncertain of how to use digital technologies in teaching learning and assessment productively. This book reports on case studies on teaching student teachers with technology in a way that advanced not only communication but also the cognitive growth of students in relation to disciplinary knowledge. The scholars from South African universities used both conceptual and empirical methodologies mostly in qualitative set ups. The scholarly contributions in this book are varied. They cover theoretical nuances for ICT use in education, considerations for the use of computers in the classroom, pedagogical thinking and pedagogical integration of ICTs in education, affordances of iPads in visible teaching and learning, supporting student cognition in Languages, Mathematics, Science, Engineering, Graphics and Design with ICTs. The use of software applications such as GeoGebra and Excel in teaching and learning mathematics is researched among others. The rich discussions that emerged from their research enable academics to learn from others' innovative moments that came as a result of pandemic pressure. The recommendations in this book can be used in blended learning beyond the COVID 19 era as curriculum delivery methods are bound to change. The value of this book is that it reports on pedagogical innovations in using digital technologies in teacher education. Researchers have an opportunity to learn from this book how to deal with the tantalising teaching and learning problem of our time. How can the use of digital technology transform teaching and learning in general and teacher education in particular?

Education in a New South Africa Robert J. Balfour, 2015-09-24 A collaborative series with the University of Cambridge Faculty of Education highlighting leading edge research across Teacher Education, International Education, Reform and Language Education.

Teacher Education for Diversity Elizabeth Walton, Ruksana Osman, 2018-02-19 Foregrounding the diversity that characterises various educational settings, this book discusses how histories and geographies of oppression, exclusion and marginalisation have impacted on teacher education. Contributors draw on first hand experiences of living and working in countries including Brazil, China, South Africa, New Zealand and Malawi. Positioned in a geographical and metaphorical Global South, the book draws critical attention to debates which have been otherwise marginalised in relation to those conducted in the Global North. Chapters address difference and diversity on both a conceptual and empirical level, acknowledging the significance of various global trends including increased migration and urbanisation and broadening understandings of race, religion, gender, sexuality and disability. Taken together, these chapters reveal the extent of the work which still remains to be done in the field of teacher education for diversity. The issues discussed are of global significance, making this text key reading for teachers, teacher educators and those concerned with the advancement of social justice and reduction of inequality through education.

Theorising Curriculum in Unsettling

Times in African Higher Education Kehdinga George Fomunyam,2023-12-15 Curriculum and all its discourses constitute the heart of education and all its paraphernalia and largely informs the happenings in higher education or universities As a result of the importance of curriculum all scholars in the field of education in general claim or appear to claim expertise in all things curriculum and how the field should unfold These struggles in the field of curriculum studies are made more complex by the unstable times the world as a whole and higher education in particular is currently facing The world in general and higher education in particular is currently dealing with and striving to readjust to the new normal and abnormalities created by the Coronavirus disease 2019 COVID 19 pandemic the calls for decolonisation the Fourth Industrial Revolution 4IR and other contextual crises in different nations across the African continent This book takes on all things curriculum in higher education placing them within the context of time and circumstances so as to articulate a way forward for the field in this unsettling times
