**Sports Law in France** Jean-Michel Marmayou, 2019-04-16 Derived from the renowned multi volume International Encyclopaedia of Laws this practical analysis of sports law in France deals with the regulation of sports activity by both public authorities and private sports organizations The growing internationalization of sports inevitably increases the weight of global regulation yet each country maintains its own distinct regime of sports law and its own national and local sports organizations Sports law at a national or organizational level thus gains a growing relevance in comparative law The book describes and discusses both state created rules and autonomous self regulation regarding the variety of economic social commercial cultural and political aspects of sports activities Self regulation manifests itself in the form of by laws and encompasses organizational provisions disciplinary rules and rules of play However the trend towards more professionalism in sports and the growing economic social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities This form of regulation appears in a variety of legal areas including criminal law labour law commercial law tax law competition law and tort law and may vary following a particular type or sector of sport It is in this dual and overlapping context that such much publicized aspects as doping sponsoring and media and responsibility for injuries are legally measured This monograph fills a gap in the legal literature by giving academics practitioners sports organizations and policy makers access to sports law at this specific level Lawyers representing parties with interests in France will welcome this very useful guide and academics and researchers will appreciate its value in the study of comparative sports law

**Ethics and Sport in Europe** Dominique Bodin, Gaelle Sempé, 2011-01-01 Defending ethics in sport is vital in order to combat the problems of corruption violence drugs extremism and other forms of discrimination it is currently facing Sport reflects nothing more and nothing less than the societies in which it takes place However if sport is to continue to bring benefits for individuals and societies it cannot afford to neglect its ethical values or ignore these scourges The major role of the Council of Europe and the Enlarged Partial Agreement on Sport EPAS in addressing the new challenges to sports ethics was confirmed by the 11th Council of Europe Conference of Ministers responsible for Sport held in Athens on 11 and 12 December 2008 A political impetus was given on 16 June 2010 by the Committee of Ministers with the adoption of an updated version of the Code of Sports Ethics Recommendation CM Rec 2010 9 emphasising the requisite co ordination between governments and sports organisations The EPAS prepared the ministerial conference and stepped up its work in an international conference organised with the University of Rennes which was attended by political leaders athletes researchers and officials from the voluntary sector The key experiences described in the conference and the thoughts that it prompted are described in this publication All the writers share the concern that the end result should be practical action particularly in terms of the setting of standards that falls within the remit of the EPAS and promotes the Council of Europe s core values

**Playing as if the World Mattered** Gabriel Kuhn, 2015-06-01 The world of sports is often associated with

commercialism corruption and reckless competition Liberals have objected to sport being used for political propaganda and leftists have decried its role in distracting the masses from the class struggle Yet since the beginning of organized sports athletes fans and officials have tried to administer and play it in ways that strengthen rather than hinder progressive social change From the workers sports movement in the early twentieth century to the civil rights struggle transforming sports in the 1960s to the current global network of grassroots sports clubs there has been a growing desire to include sports in the struggle for liberation and social justice It is a struggle that has produced larger than life figures like Muhammad Ali and iconic images such as the Black Power salute by Tommie Smith and John Carlos at the 1968 Mexico Olympics It is also a struggle that has seen sport fans in increasing number reclaiming the games they love from undemocratic associations greedy owners and corporate interests With the help of over a hundred full color illustrations from posters and leaflets to paintings and photographs *Playing as if the World Mattered* makes this history tangible Extensive lists of resources including publications films and websites will allow the reader to explore areas of interest further Being the first illustrated history of its kind *Playing as if the World Mattered* introduces an understanding of sports beyond chauvinistic jingoism corporate media chat rooms and multi billion dollar business deals Ethique et sport en Europe Dominique Bodin, Gaëlle Sempé, 2011-01-01

computer science concluding that proper understanding of a country is only possible if a genuinely interdisciplinary and truly international approach is taken one that is based on complexity science and supported by computer science Country studies should be carefully designed and collaboratively carried out and a new generation of country students should pay more attention to the fast growing potential of digitized and electronically connected libraries In this frenzied age of globalization foreign policy makers may to the benefit of a better world profit from the radically new country studies pleaded for in the book Its author emphasizes that reductionism and holism are not antagonistic but complementary arguing that parts are always parts of a whole and a whole has always parts
