Machines of Youth Gary S. Cross, 2018-05-04 For American teenagers getting a driver's license has long been a watershed moment separating teens from their childish pasts as they accelerate toward the sweet sweet freedom of their futures With driver's license in hand teens are on the road to buying and driving and maybe even crashing their first car a machine which is home to many a teenage ritual being picked up for a first date parking at a scenic overlook or blasting the radio with a gaggle of friends in tow So important is this car ride into adulthood that automobile culture has become a stand in a shortcut to what millions of Americans remember about their coming of age *Machines of Youth* traces the rise and more recently the fall of car culture among American teens In this book Gary S Cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s seducing budding adults with privacy freedom mobility and spontaneity Cross shows how the automobile redefined relationships between parents and teenage children becoming a rite of passage producing new courtship rituals and fueling the growth of numerous car subcultures Yet for teenagers today the lure of the automobile as a transition to adulthood is in decline Tinkerers are now sidelined by the advent of digital engine technology and premolded body construction while the attention of teenagers has been captured by iPhones video games and other digital technology And adults have become less tolerant of teens on the road restricting both cruising and access to drivers licenses Cars are certainly not going out of style Cross acknowledges but how upcoming generations use them may be changing He finds that while vibrant enthusiasm for them lives on cars may no longer be at the center of how American youth define themselves But for generations of Americans the modern teen experience was inextricably linked to this particularly American icon

Deconstructing Masculinity: Interrogating the Role of Symbolism in Gender Performativity Lauren Dundes ,Michael Macaluso,2024-09-19 Progress towards gender parity is hindered by unconscious ways that hypermasculinity is valorized at a symbolic level By deconstructing how social and textual phenomena as well as social structures contribute to gender performativity we can elucidate hard to discern patterns that perpetuate hegemonic masculinity The subliminal elevation of symbols of hypermasculinity excludes both women and non gender conforming men By delving into these symbolic meanings that operate subliminally we can more effectively debunk beliefs that real men fall within narrow parameters of masculinity There remains much to explore in terms of hidden pressures for men to constrain their expression of emotions project an appearance of hardness and equate violence with power to name just a few persistent facets of toxic masculinity While abstract forms of inculcating hypermasculinity are difficult to identify interrogating their role in masculine performativity will result in a more comprehensive understanding of impediments to gender equality

Pathophysiological Mechanisms of Sarcopenia in Aging and in Muscular Dystrophy: A Translational Approach Luciano Merlini,Paolo Bonaldo,Emanuele Marzetti,2016-01-18 Loss of muscle mass and increased fibrosis characterize both sarcopenia of aging and muscular dystrophy Research is increasingly showing that these two conditions also share several pathophysiological mechanisms including mitochondrial dysfunction increased apoptosis abnormal modulation of autophagy decline in satellite cells increased generation of reactive oxygen species and abnormal regulation of signaling and stress response pathways This Research Topic will cover several mechanisms involved in aging and dystrophic sarcopenia and explore the therapeutic potential of various strategies for intervention
