Some important information on to know before you get started:

- All of our jars and Spawn bags are shipped fresh and should be used within 4-6 weeks of arrival. To store them longer, they should be kept in the fridge. Do not freeze.
- Jars will arrive pre-sterilized and ready to use. You may notice some brown circles on the foil. This is a normal reaction from aluminum and heat. The jars are stacked vertically during the sterilization process.
- Please tighten the lids while unpacking. The jar lids have a tendency to loosen up from the shipping vibrations. For the 12 packs, slide the case out of the bubble bag, hand tighten each jar while they are still in the box. For the 6 jars, open the top of the bag and one by one, tighten each jar, then remove. Always leave the foil on until inoculation.
- Your spore syringes should be stored at room temperature. They should be stored in a dark, dry area. They can last up to 12 months or longer. Spore prints will not work with our jars or bags. You must use a spore syringe. For more information on spores and recommended spore vendors, visit our Q/A tab on our website.
- You can grow different spore strains in the same kit, as long as they are a similar species that require the same growing temperatures and parameters.
