Solution

I need to clean my monitor screen (without protective glass)

Do **NOT** use anything other than a microfiber cloth to wipe the screen down.

Prepare the screen by turning it off and wait until it is cool to the touch. Cleaning warm or hot screens makes it more difficult to clean and can even damage the screen.

Dust the screen. This will make cleaning easier and ensures a full, long lasting cleaning.

Wipe the screen *lightly* with a *dry* microfiber cloth. Sometimes that is all you need.

Do **NOT** use any acid or alkaline cleaning liquids as this may damage the screen.

It is always recommended to spray the microfiber cloth first, then clean the screen with the moistened cloth. Do **NOT** spray the monitor screen directly.

Lightly wipe the screen with a dampened, not wet, cloth with distilled water for everyday use cleaning.

For heavier duty cleaning, create a solution of 80% alcohol mixed with 20% water and use the damp, not wet, cloth to clean the screen and panel surface.
