Studies on Biomarkers and New Targets in Aging Research in Iran Paul C. Guest, 2021-07-31 The Middle East is known as the cradle of civilization It was the crossroads of ancient empires and the birthplace of major world religions Today it is the center of many world issues due to its economic religious and political importance Although it has lagged behind many other regions of the world in medicinal research this has increased dramatically in recent years with increasing numbers of relevant publications and the country of Iran has spearheaded this progress Much of the research has focused on increasing our understanding of the aging process and attempting to identify biomarkers and natural products to improve the human healthspan This book provides a comprehensive overview of the research conducted in the Middle East on the health benefits of curcumin a phytochemical derived from the famous spice turmeric Hundreds of studies have now been published describing the health benefits of this spice The importance of this research is exemplified by poor data regarding health and longevity as only 0.08% of the population in Iran consists of individuals over 90 years of age This is approximately 10 times lower than the percentage of this same age group in the United Kingdom and the United States of America and almost 20 times lower than that in Japan This book presents a series of reviews and meta studies describing research which has resulted in identification potential new biomarkers and drug targets for age related disorders All of the studies have focussed on the testing of curcumin and related products which have already shown some promising leads in age related conditions such as heart disease diabetes cognitive impairment and cancer The authors in this series come from different centers and cities of Iran including Mashhad Tehran Isfahan Ahvaz Birjand Quchan and Yazd and many of the chapters feature collaborations with other countries of the Middle East and throughout the world including Brazil Italy Mexico Oman Poland Switzerland the United Kingdom and the United States of America This underscores the emergence of the Middle East into this arena of research The book will be of high interest to scientific and clinical researchers in the subject of aging and age related disease and to physicians and pharmaceutical company scientists since it gives insights into the latest strategies biomarkers and targets involved in the mechanism of action of curcumin to promote healthy aging It will also provide important information on disease mechanisms related to age related disorders as each chapter will be presented in the context of specific chronic diseases

The Role of Tumor Microenvironment in the Development, Treatment and Prognosis of Hepatocellular Carcinoma Jiang Chen, Xuming Tang, Hui Liu, Zhigang Ren, 2024-01-18 Primary liver cancer PLC including hepatocellular carcinoma HCC and intrahepatic cholangiocarcinoma ICC and other rare tumors is the third leading cause of cancer related mortality Of all primary liver cancer HCC is the most common type Evidence has accumulated that the tumor microenvironment TME plays a key role in fostering or restraining tumor development The tumor microenvironment TME which includes molecular cellular extracellular matrix ECM and vascular signaling pathways is

a complex ecosystem The interaction between the tumor microenvironment and cancer cells can enhance the malignant properties of tumors including proliferation angiogenesis metastasis and therapy resistance In addition the tumor microenvironment can also lead to abnormal angiogenesis and promote immunosuppression HCC has been resistant to targeted therapy and immunotherapy Therefore further study of the tumor microenvironment of HCC may be helpful for the development of therapeutic methods for HCC

Ancient and Traditional Foods, Plants, Herbs and Spices used in Cancer Rajkumar Rajendram, Victor Preedy, Vinood Patel, 2023-10-11 The use of different foods herbs and spices to treat or prevent disease has been recorded for thousands of years Egyptian papyrus hieroglyphics and ancient texts from the Middle East have described the cultivation and preparations of herbs and botanicals to cure the sick There are even older records from China and India Some ancient scripts describe the use of medicinal plants which have never been seen within European cultures Indeed all ancient civilizations have pictorial records of different foods herbs and spices being used for medical purposes However there are fundamental questions pertaining to the scientific evidence for the use of these agents or their extracts in modern medicine There have been considerable advances in scientific techniques over the last few decades These have been used to examine the composition and applications of traditional cures Modern science has also seen the investigation of herbs spices and botanicals beyond their traditional usage For example plants which have been used for digestion or medical ills since time immemorial are now being investigated for anti cancer properties or their toxicity using high throughput screening Techniques also include molecular biology cellular biochemistry physiology endocrinology and even medical imaging However much of the material relating to the scientific basis or applications of traditional foods herbs spices and botanicals is scattered among various sources The widespread applicability of foods or botanicals is rarely described and cautionary notes on toxicity are often ignored These questions are explored in Ancient and Traditional Foods Plants Herbs and Spices used in Cancer Features Provides an evidenced based approach in describing usage and applications of traditional foods and botanicals in prevention and treatment of cancer Contains chapters on biomedical research related to cancer studies Discusses extraction and analysis of active agents in vitro studies pre clinical investigations in animals and clinical studies Bridges modern day sciences with historical backgrounds related to foods and plants With contributions from leading international experts including those from world renowned institutions this book is a reference for oncologists physicians health scientists healthcare workers pharmacologists and research scientists
