Challenges and Solutions in Internet of Things-Based Smart Applications Narendra Shekokar, Subhash K. Shinde, Smita Sanjay Ambarkar, Antonis Michalas, Monika Mangla, Achamma Thomas, 2025-01-06 Presenting innovative research oriented ideas and the implementation and socioeconomic applications of internet of things based network Challenges and Solutions in Internet of Things Based Smart Applications showcases smart waste management optical technologies for internet of things and remote patient monitoring and data analysis Presents advanced research on smart waste management using internet of things and blockchain Explains the optical technologies for internet of things and image projection on visual cortex using internet of things sensors Discusses applications in smart systems like smart automatic Covid door opening system internet of things based remote patient monitoring and integrated smart reading meter Presents comprehensive review above various security techniques of internet of things Includes different applications of internet of things based solutions in agriculture healthcare and wireless network This text is primarily written for graduate students postgraduate students professionals and academic researchers working in the fields of Computer Science and Engineering Information Technology and Electrical Engineering

Design of Intelligent Applications using Machine Learning and Deep Learning Techniques Ramchandra Sharad Mangrulkar, Antonis Michalas, Narendra Shekokar, Meera Narvekar, Pallavi Vijay Chavan, 2021-08-15 Machine learning ML and deep learning DL algorithms are invaluable resources for Industry 4.0 and allied areas and are considered as the future of computing A subfield called neural networks to recognize and understand patterns in data helps a machine carry out tasks in a manner similar to humans The intelligent models developed using ML and DL are effectively designed and are fully investigated bringing in practical applications in many fields such as health care agriculture and security These algorithms can only be successfully applied in the context of data computing and analysis Today ML and DL have created conditions for potential developments in detection and prediction Apart from these domains ML and DL are found useful in analysing the social behaviour of humans With the advancements in the amount and type of data available for use it became necessary to build a means to process the data and that is where deep neural networks prove their importance These networks are capable of handling a large amount of data in such fields as finance and images This book also exploits key applications in Industry 4.0 including Fundamental models issues and challenges in ML and DL Comprehensive analyses and probabilistic approaches for ML and DL Various applications in healthcare predictions such as mental health cancer thyroid disease lifestyle disease and cardiac arrhythmia Industry 4.0 applications such as facial recognition feather classification water stress prediction deforestation control tourism and social networking Security aspects of Industry 4.0 applications suggest remedial actions against possible attacks and prediction of associated risks Information is presented in an accessible way for students researchers and scientists business innovators and entrepreneurs sustainable assessment and management professionals This book equips readers with a knowledge of data analytics ML and

DL techniques for applications defined under the umbrella of Industry 4.0. This book offers comprehensive coverage promising ideas and outstanding research contributions supporting further development of ML and DL approaches by applying intelligence in various applications.

Handbook of Research on Cyber Crime and Information Privacy
 Cruz-Cunha, Maria Manuela, Mateus-Coelho, Nuno, 2020-08-21 In recent years industries have transitioned into the digital realm as companies and organizations are adopting certain forms of technology to assist in information storage and efficient methods of production. This dependence has significantly increased the risk of cyber crime and breaches in data security. Fortunately, research in the area of cyber security and information protection is flourishing; however, it is the responsibility of industry professionals to keep pace with the current trends within this field. The Handbook of Research on Cyber Crime and Information Privacy is a collection of innovative research on the modern methods of crime and misconduct within cyber space. It presents novel solutions to securing and preserving digital information through practical examples and case studies. While highlighting topics including virus detection, surveillance technology, and social networks, this book is ideally designed for cybersecurity professionals, researchers, developers, practitioners, programmers, computer scientists, academicians, security analysts, educators, and students seeking up-to-date research on advanced approaches and developments in cyber security and information protection.

Using Computational Intelligence for the Dark Web and Illicit Behavior Detection
 Rawat, Romil, Kaur, Upinder, Khan, Shadab Pasha, Sikarwar, Ranjana, Sankaran, K. Sakthidasan, 2022-05-06 The Dark Web is a known hub that hosts myriad illegal activities behind the veil of anonymity for its users. For years now, law enforcement has been struggling to track these illicit activities and put them to an end. However, the depth and anonymity of the Dark Web has made these efforts difficult, and as cyber criminals have more advanced technologies available to them, the struggle appears to only have the potential to worsen. Law enforcement and government organizations also have emerging technologies on their side; however, it is essential for these organizations to stay up-to-date on these emerging technologies such as computational intelligence in order to put a stop to the illicit activities and behaviors presented in the Dark Web. Using Computational Intelligence for the Dark Web and Illicit Behavior Detection presents the emerging technologies and applications of computational intelligence for the law enforcement of the Dark Web. It features analysis into cybercrime data, examples of the application of computational intelligence in the Dark Web, and provides future opportunities for growth in this field. Covering topics such as cyber threat detection, crime prediction, and keyword extraction, this premier reference source is an essential resource for government organizations, law enforcement agencies, non-profit organizations, politicians, computer scientists, researchers, students, and academicians.
