Self-trust Keith Lehrer, 1997-01-01 Keith Lehrer offers an original philosophical view of principal aspects of the human condition such as reason knowledge wisdom autonomy love consensus and consciousness Three unifying ideas run through the book The first is that what is uniquely human is the capacity for metamental ascent the ability to consider and evaluate first order mental states such as beliefs and desires that arise naturally within us A primary function of this metamental ascent is the resolution of personal and interpersonal conflict essential to such central human goods as wisdom autonomy and consensus The second unifying idea is that we have a system for such reflective evaluation which yields acceptance in relation to beliefs or preference in relation to the objects of desires The third unifying idea is that there are keystones of evaluation in this system loops of trustworthiness that are themselves supported by the structure that they hold together Self trust is the basis of our trustworthiness on which reason knowledge and wisdom are grounded

Power of Emotions: On the Affective Constitution of Political Struggle Andreas Ventsel, Peeter Selg, 2025-07-11 The emergence of political identities and communities in social media is largely driven by affective responses to current events a tendency facilitated by the dominance of emotionally and visually oriented communication However this mode of community formation leads first to the inherent instability and transience of these groups and second to the oversimplification of complex socio political issues into binary yes no alternatives Within this framework deliberation and argumentation based problem solving become increasingly difficult as discourse is supplanted by emotional reactions that position individuals either for or against an issue Particularly significant is the role of affect and emotion in communication during times of crisis whether in the context of migration the COVID 19 pandemic or the war in Ukraine This affective role is evident in the anchoring of public discourse to personal emotions and the generation and dissemination of

hashtags and tags that consolidate diverse phenomena under a unified label Such collective identity coalesces around connective action which is primarily driven either by opposition to the established order or by the reinforcement of a preexisting system's foundations Consequently the emergence of these affective publics must be analyzed within the broader context of power dynamics and evolving forms of identification in the contemporary media sphere forms rooted in shared practices of expression action and interpretation This edited volume will explore the manifestations of affective semiosis meaning making at the socio cultural and discursive levels Cultural context emotional reactions and affective semiosis play a crucial role in shaping how issues related to identity and security are articulated in both domestic and foreign policy as well as in the ways solutions to these challenges are sought By adapting the concept of affective semiosis for the analysis of discursive structures this volume offers an innovative and effective approach to identifying the triggers of emotional reactions in discourse and examining their impact on the construction of political identities fear scenarios misinformation campaigns polarization and other dynamics within networked societies The volume includes both theoretically oriented papers as well as analyses of empirical materials

The Testimony of Sense Tim Milnes, 2019-07-04 The Testimony of Sense attempts to answer a neglected but important question what became of epistemology in the late eighteenth century in the period between Hume's scepticism and Romantic idealism It finds that two factors in particular reshaped the nature of empiricism the socialisation of experience by Scottish Enlightenment thinkers and the impact upon philosophical discourse of the belletrism of periodical culture The book aims to correct the still widely held assumption that Hume effectively silenced epistemological inquiry in Britain for over half a century Instead it argues that Hume encouraged the abandonment of subject centred reason in favour of models of rationality based upon the performance of trusting actions within society Of particular interest here is the way in which after Hume fundamental ideas like the self truth and meaning are conceived less in terms of introspection correspondence and reference and more in terms of community coherence and communication By tracing the idea of intersubjectivity through the issues of trust testimony virtue and language the study offers new perspectives on the relationships between philosophy and literature empiricism and transcendentalism and Enlightenment and Romanticism As philosophy grew more conversational the familiar essay became a powerful metaphor for new forms of communication The book explores what is epistemologically at stake in the familiar essay genre as it develops through the writings of Joseph Addison David Hume Samuel Johnson Charles Lamb and William Hazlitt It also offers readings of philosophical texts such as Hume's Treatise Thomas Reid's Inquiry and Adam Smith's Theory of Moral Sentiments as literary performances
