#### Caution on heat generation

- This unit incorporates a cooling fan on the rear to deal with the large amount of heat generation. The fan starts rotating automatically when the internal temperature of the unit rises above the set point and never stops the rotation after rotation.
- Maintain clearances of more than 10 cm on the left and right, vertical and above the unit. When the unit is installed in a rack, do not close left with a door.
- The cooling fan of this unit is designed to absorb external air. A curtain or sheet of paper is placed in the unit, the internal temperature may rise, and the sound may not be produced when the protection circuitry is activated due to temperature rise. Please be careful against this.

To absorb heat radiation, leave a space about 10 cm between the unit and the walls of rack structure.

*Audio Amateur* ,1982 **Practical Bilevel Optimization** Jonathan F. Bard,1998-12-31 The focus of this book is on bilevel programming which combines elements of hierarchical optimization and game theory The basic model addresses the problem where two decision makers each with their individual objectives act and react in a noncooperative manner The actions of one affect the choices and payoffs available to the other but neither player can completely dominate the other in the traditional sense Over the last 20 years there has been a steady growth in research related to theory and solution methodologies for bilevel programming This interest stems from the inherent complexity and consequent challenge of the underlying mathematics as well as the applicability of the bilevel model to many real world situations The primary aim of this book is to provide a historical perspective on algorithmic development and to highlight those implementations that have proved to be the most efficient in their class A corollary aim is to provide a sampling of applications in order to demonstrate the versatility of the basic model and the limitations of current technology What is unique about this book is its comprehensive and integrated treatment of theory algorithms and implementation issues It is the first text that offers researchers and practitioners an elementary understanding of how to solve bilevel programs and a perspective on what success has been achieved in the field Audience Includes management scientists operations researchers industrial engineers mathematicians and economists **Black Belt** ,1989-04 The oldest and most respected martial arts title in the industry this popular monthly magazine addresses the needs of martial artists of all levels by providing them with information about every style of self defense in the world including techniques and strategies In addition Black Belt produces and markets over 75 martial arts oriented books and videos including many about the works of Bruce Lee the best known marital arts figure in the world *Dictionary Catalog of the Music Collection* New York Public Library.
