Creating the Suburban School

Advantage John L. Rury, 2020-04-15 Creating the Suburban School Advantage explains how American suburban school districts gained a competitive edge over their urban counterparts John L Rury provides a national overview of the process focusing on the period between 1950 and 1980 and presents a detailed study of metropolitan Kansas City a region representative of trends elsewhere While big city districts once were widely seen as superior and attracted families seeking the best educational opportunities for their children suburban school systems grew rapidly in the post World War II era as middle class and more affluent families moved to those communities As Rury relates at the same time economically dislocated African Americans migrated from the South to center city neighborhoods testing the capacity of urban institutions As demographic trends drove this urban suburban divide a suburban ethos of localism contributed to the socioeconomic exclusion that became a hallmark of outlying school systems School districts located wholly or partly within the municipal boundaries of Kansas City Missouri make for revealing cases that illuminate our understanding of these national patterns As Rury demonstrates struggles to achieve greater educational equity and desegregation in urban centers contributed to so called white flight and what Senator Daniel Patrick Moynihan considered to be a crisis of urban education in 1965 Despite the often valiant efforts made to serve inner city children and bolster urban school districts this exodus Rury cogently argues created a new metropolitan educational hierarchy a mirror image of the urban centric model that had prevailed before World War II The stubborn perception that suburban schools are superior based on test scores and budgets has persisted into the twenty first century and instantiates today s metropolitan landscape of social economic and educational inequality

ELL Service Minutes and MAP Test Achievement

Natalie Lyons, 2013 School districts across the United States attempt to meet the needs of ELL English Language Learner students in a variety of ways A medium sized suburban school district in the Kansas City metropolitan area encounters a varying ELL population each year and continues to service the needs of elementary ELL students with a pull out model With only one traveling elementary ELL teacher employed by the district ELL service time with a qualified ELL teacher is minimal for most elementary ELL students The study involves three research questions 1 Do the average weekly ELL service minutes for Elementary students in the school

district meet the recommended number of service minutes from the Missouri Department of Elementary and Secondary Education DESE 2 Is there a relationship between ELL service minutes and achievement on the Missouri Assessment Program MAP test for third and fourth grade ELL students 3 Would an additional elementary ELL teacher increase MAP test scores The analysis of this particular district s service minutes as compared to those recommended by Missouri s Department of Elementary and Secondary Education show this school district grossly underserves its ELL students A study of this school district s third and fourth grade ELL students service minutes and their MAP Missouri Assessment Program test scores from 2012 2013 were analyzed and the results show a negative correlation in Communication Arts and a positive correlation in Math although though both correlations were extremely weak due to the small sample size Due to lack of significance in the data analyzed a conclusion as to whether or not an additional elementary ELL teacher would increase ELL student test scores is not clear however when considering state recommended student to teacher ratios and minimum service minutes the conclusion can be drawn that the district should examine its allocation of resources to the ELL program **The**

Design, Utilization, and Analysis of Simulations and Game-Based Educational Worlds Ferdig, Richard E.,2013-05-31 Games and simulations have emerged as new and effective tools for educational learning by providing interactivity and integration with online resources that are typically unavailable with traditional educational resources Design Utilization and Analysis of Simulations and Game Based Educational Worlds presents developments and evaluations of games and computer mediated simulations in order to showcase a better understanding of the role of electronic games in multiple studies This book is useful for researchers practitioners and policymakers to gain a deeper comprehension of the relationship between

research and practice of electronic gaming and simulations in the educational environment Effect of Student-teacher Ratio on Third Grade Communication Arts MAP Scores in Northwestern Missouri Sara Willis, Jessica Knott, 2014 The purpose of this research was to describe the difference between the 3rd grade Communication Arts MAP scores of smaller and larger student teacher ratios The study used existing data from the Missouri Assessment Program for third grade Communication Arts which was provided by the Missouri Department of Elementary and Secondary Education The Department of Education gathers MAP data from all the schools in the state of Missouri which is public information The mean percent of Advanced and Proficient 3rd grade CA MAP scores were collected and combined from forty five school districts in Northern Missouri over a time period from 2009 2013 Of these districts twenty were rural from the Harrison Davies Conference and Grand River Conference and twenty five were suburban from the Midland Empire Conference Also collected from these districts were the class sizes over a period from 2009 2013 The researchers then separated the data into three groups based on class sizes Group 1 included classes of 0 14 students Group 2 included classes with 15 18 students and Group 3 included classes with 19 22 students The researchers used the ANOVA to determine that there is not a significant difference p value of 0 125 in student achievement on the MAP test between smaller student teacher ratios and larger student teacher ratios Therefore the action researchers do not suggest that school districts use student teacher ratio reduction as a means to improve third grade CA Arts scores on the MAP test **MacRae's Blue Book and Hendricks' Commercial Register** ,1949 *The Resegregation of Schools* Jamel K. Donnor, Adrienne Dixon, 2013-06-07 Access to a quality education remains the primary mechanism for improving one's life chances in the United States and for children of color a good education is particularly linked to their individual and collective well being Despite the popular perception that America is in a post racial epoch opportunities to access quality learning environments and human development resources remain determined according to race class gender and ability Taking a more nuanced approach to race and the resegregation of the American school system this volume examines how and why the education quality for the majority of students of color in America remains fundamentally unequal **El-Hi Textbooks and Serials in Print** ,1987 *Geographical Abstracts Index* ,1983
