for which drawing has historically been used in science education An instance of observation Audubon Linnaeus A process how plants grow over time what happens when chemicals combine Conceptions of what science is and who does it Images of identity development in science teaching and learning *Linguistic Data Science and the English Passive* Axel Bohmann, Julia Müller, Mirka Honkanen, Miriam Neuhausen, 2025-11-13 The choice between BE and GET as auxiliary verbs as in She was promoted vs She got promoted is a central grammatical feature yet the many proposed nuances conditioning this phenomenon have escaped large scale empirical validation to date This book fills this gap using multivariate statistical analyses of several large corpora to explore different factors determining the choice of English passive auxiliary Addressing both diachronic developments using the Corpus of Historical American English and synchronic regional variation using the Corpus of Global Web based English the book employs methods that combine traditional corpus linguistics with newer machine learning tools in an innovative and intricate manner To circumscribe the variable context the authors train a statistical model to distinguish central from peripheral passives The study tests the influence of various predictors derived from the previous literature on the passive with the use of automated sentiment analysis and subject detection manual animacy coding distributional semantics and a mixed effects regression model Putting forward an automatic way of distinguishing more stative from more dynamic passives the book demonstrates how to examine the passive construction in a much larger dataset than in previous studies and shows how advanced computational models can be used to productively engage traditional philological questions such as those related to language change and regional variation
