**A Comparative Study of Funding Shareholder Litigation** Wenjing Chen, 2017-04-25 This book studies the funding problems with shareholder litigation through a functionally comparative way In fact funding problems with shareholder lawsuits may largely discourage potential shareholder litigants who bear high financial risk in pursuing such a claim but on the other hand they may not have much to

gain Considering the lack of incentives for potential shareholder claimants effective funding techniques should be in place to make shareholder actions function as a corporate governance tool and discipline corporate management The book analyzes among others the practice of funding shareholder litigation in the Australia Canada the UK the US and Israel and covers all of the typical approaches being used in financing shareholder litigation in the current world For instance Israel and Canada Quebec and Ontario are probably unique in having a public funding mechanism for derivative actions and class actions while Australia is the country where third party litigation funding is originated and is growing rapidly Based on this comparative research the last part of this book discusses how to fund shareholder litigation in China in context of its social and legal background and what kind of problems need to be solved if certain funding techniques are used **Promoting**

**Information in the Marketplace for Financial Services** Paul Latimer,Philipp Maume,2014-11-14 This book provides a unique comparative and global analysis of the regulation of disclosure in financial securities markets It is written by two authors who represent both the new world Australia and the old world Germany The authors present their research in the global business context with legal and regulatory perspectives including some references from Africa Asia the Middle East and South America After every boom and bust legislators pass new disclosure legislation often in a heated environment fuelled by politics and the media Little regard is paid to existing regulation or the lessons learned from earlier regulation The result is the continuing enactment of redundant and overlapping disclosure laws Since financial markets are often described as markets for information the failure to ensure disclosure is at the heart of financial services regulation This book argues that the solution to the failure of disclosure is a brief easily understood principles based plain English safety net amendment to statute law such as you must keep the financial market fully informed a measure that would support effective mandatory continuous disclosure of information to financial markets This book examines the reasons for disclosure regulation and how the efficient operation of financial markets is dependent on disclosure It examines the adequacy of common law and civil law concerning broker client disclosure and concludes that industry licensing in itself fails to keep the market informed While recognizing the failures of securities commissions to achieve good disclosure in financial markets it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets such as the stock exchange Coregulation builds on financial market self regulation and is best described in the words of one time SEC Chairman William O Douglas who in the 1930s described it as a shotgun behind the door Annual Report Bank
