Reconciling International Trade and Labor Protection Wolfgang Plasa, 2015-08-20 Over the last two decades or so a number of developing countries have become important suppliers of manufactured goods A good deal of these goods are produced under extremely poor working conditions incompatible with the fundamental rights and freedoms However WTO rules do not allow restrictions on imports of such goods and the ILO hardly ever sanctions violations of international labor standards On the one hand this leaves exporting countries free to compromise on labor protection in order to enhance their competitiveness on foreign markets On the other hand importing countries are obliged to keep their markets open for goods produced under substandard labor conditions This gives rise to the question of whether the rules of the multilateral trading system should be linked to international labor standards This study argues that there are two trade related reasons for establishing such a link The first one is commonly referred to as social dumping GATT rules enshrine the principles that should govern international trade fairness and responsibility These principles should also apply where trade meets labor protection Exporting goods made under substandard labor conditions is unfair and distorts trade It would therefore be consistent to make social dumping actionable The other reason concerns the responsibility of importing countries Increased imports of goods produced under substandard labor conditions are an incentive for the exporting country to produce more goods under the same labor conditions and ship them to the same importing country This results in a proliferation of violations of labor standards for which the importing country shares the responsibility There is a need to adopt a link between trade and labor standards

enabling the importing country to cap imports in order to escape the blame *Militarizing the Environment* Robert P. Marzec, 2015-12-21 As the seriousness of climate change becomes more and more obvious military institutions are responding by taking a prominent role in the governing of environmental concerns engaging in climate change war games and preparing for the effects of climate change from conflicts due to loss of food water and energy to the mass migration of millions of people displaced by rising sea levels This combat oriented stance stems from a self destructive pattern of thought that Robert P Marzec names environmentalism an attitude that has been affecting human environmental relations since the seventeenth century *Militarizing the Environment* traces the rise of this influential mindset in America and other nations that threatens to supplant ideas of sustainability with demands for adaptation In this extensive historical study of scientific military political and economic formations across five centuries Marzec reveals how environmentalism has been instrumental in the development of today's security society informing the creation of the military industrial complex during World War II and the National Security Act that established the CIA during the Cold War Now embedded in contemporary Western thought environmentalism has even infiltrated scientific thinking transforming Darwinian insights into a quasi theology that makes security the biological basis of existence Marzec exposes the self destructive nature of this increasingly accepted worldview and offers alternatives that counter the blind alleys of national and global security *Encyclopedia of Global Justice* Deen K. Chatterjee, 2012-01-23 This two volume *Encyclopedia of Global Justice* published by Springer along with Springer's book series *Studies in Global Justice* is a major publication venture toward a comprehensive coverage of this timely topic The *Encyclopedia* is an international interdisciplinary and collaborative project spanning all the relevant areas of scholarship related to issues of global justice and edited and advised by leading scholars from around the world The wide ranging entries present the latest ideas on this complex subject by authors who are at the cutting edge of inquiry The *Encyclopedia* sets the tone and direction of this increasingly important area of scholarship for years to come The entries number around 500 and consist of essays of 300 to 5000 words The inclusion and length of entries are based on their significance to the topic of global justice regardless of their importance in other areas *Sustainable Peace in Northeast Asia* Yong-Shik Lee, 2023-09-05 *Sustainable Peace in Northeast Asia* examines the causes of lasting and complex tensions in the region from underlying political historical military and economic perspectives discusses their historical development and political economic implications for the world and explores possible solutions to build lasting peace The book is unique in that it approaches the topic from the historical perspective of each constituent country in the region Major global powers such as the United States and Russia have also closely engaged in the political and economic affairs of this region through a network of alliances diplomacy trade and investment The book also discusses the influence of these external powers over the crisis their political and economic objectives in the region their strategies and the dynamics that their engagement has created Both South Korea and North Korea have sought reunification of the Korean peninsula which will have a substantial impact on
