African Foreign Policies in International Institutions Jason Warner, Timothy M. Shaw, 2018-05-18 This book is the first to exclusively consider the foreign policy tendencies of African states in international institutions As an edited volume offering empirically based perspectives from a variety of scholars this project disabuses the notion that Africa should be considered a niche interest in the field of foreign policy analysis It asserts that the actions of the continent s states collectively serve as an important heuristic by which to interrogate and understand the foreign policies of other global states and are not simply anomalously extant entities whose actions should be studied only insofar as they deviate from predictions

based on the experiences of Western or other non African states , **The Politics of Hate Speech Laws** Alexander Brown,Adriana Sinclair,2019-09-18 This book examines the complex relationship between politics and hate speech laws domestic and international How do political contexts shape understandings of what hate speech is and how to deal with it Why do particular states enact hate speech laws and then apply extend or reform them in the ways they do What part does hate speech play in international affairs Why do some but not all states negotiate agree and ratify international hate speech frameworks or instruments What are some of the best and worst political arguments for and against hate speech laws Do political figures have special moral duties to refrain from hate speech Should the use of hate speech by political figures be protected by parliamentary privilege Should this sort of hyperpolitical hate speech be subject to the laws of the land civil and criminal Or should it instead be handled by parliamentary codes of conduct and procedures or even by political parties themselves What should the codes of conduct look like Brown and Sinclair answer these important and overlooked questions on the politics of hate speech laws providing a substantial body of new evidence insights arguments theories and practical recommendations The primary focus is on the UK and the US but several other country contexts are also explored and compared in detail including Nigeria Kenya South Africa India China Japan Turkey Germany Hungary and Italy Methodologically the two authors draw on approaches and concepts from a range of academic disciplines including law and legal theory political theory applied ethics political science and sociology international relations theory and international law

without Othering john a. powell, Stephen Menendian, 2024-04-23 The root of all inequality is the process of othering and its solution is the practice of belonging We all yearn for connection and community but we live in a time when calls for further division along the well wrought lines of religion race ethnicity caste and sexuality are pervasive This ubiquitous yet elusive problem feeds on fears created inherited of the other While the much touted diversity equity and inclusion initiatives are undeniably failing and activists narrowly focus on specific and sometimes conflicting communities Belonging without Othering prescribes a new approach that encourages us to turn toward one another in unprecedented and radical ways The pressures that separate us have a common root our tendency to cast people and groups in irreconcilable terms or the process of othering This book gives vital language to this universal problem unveiling its machinery at work across time and around the world To subvert it john a. powell and Stephen Menendian make a powerful and sweeping case for adopting a paradigm of belonging that does not require the creation of an other This new paradigm hinges on transitioning from narrow to expansive identities even if that means challenging seemingly benevolent forms of community building based on othering As the threat of authoritarianism grows across the globe this book makes the case that belonging without othering is the necessary but not the inevitable next step in our long journey toward creating truly equitable and thriving societies The authors argue that we must build institutions cultivate practices and orient ourselves toward a shared future not only to heal ourselves but perhaps to save our planet as well Brimming with clear guidance sparkling insights and specific examples and practices Belonging without Othering is a future oriented exploration that ushers us in a more hopeful direction
