**Art and Architecture in the Islamic Tradition** Mohammed Hamdouni

Alami,2013-12-20 What is art in the sense of the Islamic tradition Mohammed Hamdouni Alami argues that Islamic art has historically been excluded from Western notions of art that the Western aesthetic tradition s preoccupation with the human body and the ban on the representation of the human body in Islam has meant that Islamic and Western art have been perceived as inherently at odds However the move away from this anthropomorphic aesthetic in Western art movements such as modern abstract and constructivist painting have presented the opportunity for new ways of viewing and evaluating Islamic art and architecture This book questions the very idea of art predicated on the anthropocentric bias of classical art and the corollary exclusion of Islamic art from the status of art It addresses a central question in post classical aesthetic theory in as much as the advent of modern abstract and constructivist painting have shown that art can be other than the representation of the human body that art is not neutral aesthetic contemplation but it is fraught with power and violence and that the presupposition of classical art was not a universal truth but the assumption of a specific cultural and historical set of practices and vocabularies Based on close readings of classical Islamic literature philosophy poetry medicine and theology along with contemporary Western art theory the author uncovers a specific Islamic theoretical vision of art and architecture based on poetic practice politics cosmology and desire In particular it traces the effects of decoration and architectural planning on the human soul as well as the centrality of the gaze in this poetic view in Arabic nazar while

examining its surprising similarity to modern theories of the gaze Through this double gesture moving critically between two traditions the author brings Islamic thought and aesthetics back into the realm of visibility addressing the lack of recognition in comparison with other historical periods and traditions This is an important step toward a critical analysis of the contemporary debate around the revival of Islamic architectural identity a debate intricately embedded within opposing Islamic political and social projects throughout the world *Early Islamic Art and Architecture* Jonathan M. Bloom, 2017-05-15 This volume deals with the formative period of Islamic art to c 950 and the different approaches to studying it Individual essays deal with architecture ceramics coins textiles and manuscripts as well as with such broad questions as the supposed prohibition of images and the relationships between sacred and secular art An introductory essay sets each work in context it is complemented by a bibliography for further reading **Essays in Islamic Art and Architecture** Abbas Daneshvari, 1981-01-01 Beauty and Islam Valerie Gonzalez, 2001-08-24 Beauty and Islam explores aspects of aesthetics in classical Islamic thought in the light of contemporary theories offering new perspectives on Islamic art and architecture with examples ranging from the Qur'an and the Alhambra to the works of present day artists and philosophers Tracing the roots of Islamic aesthetics back to the works of the great philosophers of the Middle Ages such as Avicenna and Averroes Valerie Gonzalez finds that aesthetic theory in Islam must be seen within the much wider context of parallel thinking on theology ethics physics and metaphysics Islamic Art and Beyond Oleg Grabar, 2006 The articles selected for Islamic Art and Beyond the third in the set of four selections of articles by Oleg Grabar illustrate how the author's study of Islamic art led him in two directions for a further understanding of the arts One is how to define Islamic art and what impulses provided it with its own peculiar forms and dynamics of growth The other issue is that of the meanings to be given to forms like domes so characteristic of Islamic art or to terms like symbol signs or aesthetic values in the arts especially when one considers the contemporary world *Muqarnas* Oleg Grabar, 1990-12-31 **A Companion to Islamic Art and Architecture, 2 Volume Set** Finbarr Barry Flood, Gulru Necipoglu, 2017-09-13 The two volume Companion to Islamic Art and Architecture bridges the gap between monograph and survey text by providing a new level of access and interpretation to Islamic art The more than 50 newly commissioned essays revisit canonical topics and include original approaches and scholarship on neglected aspects of the field This two volume Companion showcases more than 50 specially commissioned essays and an introduction that survey Islamic art and architecture in all its traditional grandeur Essays are organized according to a new chronological geographical paradigm that remaps the unprecedented expansion of the field and reflects the nuances of major artistic and political developments during the 1400 year span The Companion represents recent developments in the field and encourages future horizons by commissioning innovative essays that provide fresh perspectives on canonical subjects such as early Islamic art sacred spaces palaces urbanism ornament arts of the book and the portable arts while introducing others that have been previously neglected including unexplored geographies and periods

transregional connectivities talismans and magic consumption and networks of portability museums and collecting and contemporary art worlds the essays entail strong comparative and historiographic dimensions The volumes are accompanied by a map and each subsection is preceded by a brief outline of the main cultural and historical developments during the period in question The volumes include periods and regions typically excluded from survey books including modern and contemporary art architecture China Indonesia Sub Saharan Africa Sicily the New World Americas

**The Islamic Art and Architecture** Sir Thomas Walker Arnold, 2001 Islamic Art and Architecture, 1962 *Making Sense of Islamic Art & Architecture* Adam Barkman, 2015 Making Sense of Islamic Art Architecture is designed to equip the cultural tourist and art student with the means to interpret paintings buildings or artefacts in terms of the iconography and symbolism of Islam With reference to 100 clearly illustrated and diverse historical works readers will learn to identify the telling details that mean so much to Muslims The book's layout is both visually striking and accessible Each double page spread features a full page colour photograph of either a detail of the work or its context depending on the subject with a second photograph chosen to illustrate important aspects of the work Alongside is a detailed exposition of the work's significance in Islamic art history and philosophy with key historical facts about the work including where it may be seen today By tracing the paths between Islamic belief and artistic intention this book will deepen understanding not only of Islamic art and architecture but also of Islam itself

*Inside/Outside Islamic Art and Architecture* Saygin Salgirli, 2021-07-29 When we walk into a gallery we have a fairly good idea where the building begins and ends and inside while observing a painting we are equally confident in distinguishing between the painting proper and its frame and borders Yet things are often more complicated A building defines an exterior space just as much as an interior and what we perceive to be ornamental and marginal to a given painting may in fact be central to what it represents In this volume a simple question is presented instead of dichotomous separations between inside and outside or exterior and interior what other relationships can we think of The first book of its kind to grapple with this question Inside Outside Islamic Art and Architecture focuses on a wide spectrum of mediums and topics including painted manuscripts objects architectural decoration architecture and urban planning and photography Bringing together scholars with diverse methodologies who work on a geographical span stretching from India to Spain and Nigeria and across a temporal spectrum from the thirteenth to the twenty first century this original book also poses engaging questions about the boundaries of the field
