Index Islamicus ,2007 *Islamic Astronomy and Geography* David A. King,2022-02-13 This volume of 12 studies mainly published during the past 15 years begins with an overview of the Islamic astronomy covering not only sophisticated mathematical astronomy and instrumentation but also simple folk astronomy and the ways in which astronomy was used in the service of religion It continues with discussions of the importance of Islamic instruments and scientific manuscript illustrations Three studies deal with the regional schools that developed in Islamic astronomy in this case Egypt and the Maghrib Another focuses on a curious astrological table for calculating the length of life of any individual The notion of the world centred on the sacred Kaaba in Mecca inspired both astronomers and proponents of folk astronomy to propose methods for finding the qibla or sacred direction towards the Kaaba their activities are surveyed here The interaction between the mathematical and folk traditions in astronomy is then illustrated by an 11th century text on the qibla in Transoxania The last three studies deal with an account of the geodetic measurements sponsored by the Caliph al Ma'mun in the 9th century a world map in the tradition of the 11th century polymath al-Biruni alas corrupted by careless copying and a table of geographical coordinates from 15th century Egypt **Herbal Medicine in Yemen** ,2012-08-27 Traditional medical lore along with its practitioners druggists and healers survives in Yemen today Owing to the country's rich biodiversity the main body of the medicines is plant based This book features fourteen scholars from Europe North America and the Middle East three of them from Yemen who represent both humanities and natural sciences They address the topic of herbal medicines and their multifaceted applications within traditional Yemeni society across boundaries of disciplines such as Islamic studies history social anthropology pharmacy and agriculture The approaches are based on textual analysis empirical research and laboratory experiment Both historical and contemporary issues are covered Contributors include Mohammed Al Duais Jacques Fleurentin Amin Al Hakimi Ingrid Hehmeyer Gottfried Jetschke Efraim Lev Ulrike Lindequist Miranda Morris Ester Muchawsky Schnapper Frédéric Pelat Mikhail Rodionov Petra Schmidl Daniel Martin Varisco and Anhar Yaniri *The Qur'an as Text* Wild,2021-09-20 This book contains the updated papers of an international symposium The Qur'an as Text which was held at the University of Bonn in November 1993 This collection intends to break away from the 19th century paradigm of influences which seems largely exhausted but still dominates Qur'anic studies Instead this collection focuses on the literary the intertextual and the receptional aspects of the Qur'anic text A new approach to the holy book of Islam in the light of modern hermeneutics which is based on modern methods of literary history text linguistics and aesthetics can open the door for a new and more adequate understanding of the Qur'an its role for Islamic religion and its unique place in the history of world religions today Prognostication in the Medieval World Matthias Heiduk,Klaus Herbers,Hans-Christian Lehner,2020-11-09 Two opposing views of the future in the Middle Ages dominate recent historical scholarship According to one opinion medieval societies were expecting the near end of the world and therefore had no concept of the future According to the other opinion the expectation of the near end created a drive to change the world for the better and thus for

innovation Close inspection of the history of prognostication reveals the continuous attempts and multifold methods to recognize and interpret God's will the prodigies of nature and the patterns of time That proves on the one hand the constant human uncertainty facing the contingencies of the future On the other hand it demonstrates the firm belief during the Middle Ages in a future which could be shaped and even manipulated The handbook provides the first overview of current historical research on medieval prognostication It considers the entangled influences and transmissions between Christian Jewish Islamic and non monotheistic societies during the period from a wide range of perspectives An international team of 63 renowned authors from about a dozen different academic disciplines contributed to this comprehensive overview **The Muslim World Book Review** ,2011 **Logic, Soul, and World** Asad Q.
