Abstract

This literature review examines the impact of social media on adolescent mental health. The review synthesizes existing research to explore the positive and negative effects of social media use among teenagers, highlighting key findings from studies conducted after 2050. Although social media provides opportunities for social connection, research indicates that excessive use may contribute to anxiety, depression, and poor self-esteem among adolescents. The review concludes with recommendations for further research and the importance of promoting healthy social media habits.

Introduction

Social media has become an integral part of adolescent life, with platforms like Instagram, Snapchat, and TikTok gaining significant popularity. While social media offers adolescents the opportunity to engage with peers and access information, concerns have emerged regarding its potential impact on mental health. Research has highlighted both beneficial and harmful effects, yet the exact nature of this relationship remains unclear. This literature review aims to synthesize existing studies on the topic and examine the implications of social media use for adolescent mental health.

This book is designed to help you achieve one specific goal. It is not designed to give you the philosophies of conducting research. It is not designed to give you a background in a specific academic discipline or a specific topic. It is not designed to give you theory. It is designed specifically to instruct you in the practicalities of the writing process used to create strong, thorough and potentially bulletproof literature reviews. This book is the culmination of years of research experience. It is also the culmination of several years of teaching writing and critical thinking to doctoral students. Although it began as a tool for doctoral students, it has been expanded to be useful for everyone from senior high school students through doctoral candidates working on developing their first literature review or a larger literature review than they normally develop. It has been created for everyone from academics to new business entrepreneurs with good ideas who are trying to write their first reviews to support the new idea they are proposing.
