John Deere Owner Manual:

The End of Ownership Aaron Perzanowski, Jason Schultz, 2018-03-16 An argument for retaining the notion of personal property in the products we buy in the digital marketplace If you buy a book at the bookstore you own it You can take it home scribble in the margins put it on the shelf lend it to a friend sell it at a garage sale But is the same thing true for the ebooks or other digital goods you buy Retailers and copyright holders argue that you don't own those purchases you merely license them That means your ebook vendor can delete the book from your device without warning or explanation as Amazon deleted Orwell's 1984 from the Kindles of surprised readers several years ago These readers thought they owned their copies of 1984 Until it turned out they didn't In *The End of Ownership* Aaron Perzanowski and Jason Schultz explore how notions of ownership have shifted in the digital marketplace and make an argument for the benefits of personal property Of course ebooks cloud storage streaming and other digital goods offer users convenience and flexibility But Perzanowski and Schultz warn consumers should be aware of the tradeoffs involving user constraints permanence and privacy The rights of private property are clear but few people manage to read their end user agreements Perzanowski and Schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits But most important it would affirm our sense of self-direction and autonomy If we own our purchases we are free to make whatever lawful use of them we please Technology need not constrain our freedom it can also empower us

Farm Fresh Broadband Christopher Ali, 2021-09-21 An analysis of the failure of U.S. broadband policy to solve the rural-urban digital divide with a proposal for a new national rural broadband plan As much of daily life migrates online broadband high-speed internet connectivity has become a necessity The widespread lack of broadband in rural America has created a stark urban-rural digital divide In *Farm Fresh Broadband* Christopher Ali analyzes the promise and the failure of national rural broadband policy in the United States and proposes a new national broadband plan He examines how broadband policies are enacted and implemented explores business models for broadband providers surveys the technologies of rural broadband and offers case studies of broadband use in the rural Midwest Ali argues that rural broadband policy is both broken and incomplete broken because it lacks coordinated federal leadership and incomplete because it fails to recognize the important roles of communities cooperatives and local providers in broadband access For example existing policies favor large telecommunication companies crowding out smaller nimbler providers Lack of competition drives prices up rural broadband can cost 37 percent more than urban broadband The federal government subsidizes rural broadband by approximately 6 billion Where does the money go Ali proposes democratizing policy architecture for rural broadband modeling it after the wiring of rural America for electricity

and telephony Subsidies should be equalized not just going to big companies The result would be a multistakeholder system guided by thoughtful public policy and funded by public and private support 1025R Compact Tractor Owner's Manual
